The 13th Session of the GF-TADs Steering Committee
Abuja, Nigeria I 10-12 November 2026

Digital transformation of Animal Health Surveillance Systems

Regional Consultation

Charles Bebay
Regional Animal Health Coordinator
Regional Office for Africa

Strategic Context

a. Livestock contributes approximately 35% of Africa agricultural GDP

b. Animal diseases cost Sub-Saharan Africa over US$4 billion annually

c. Digital transformation is critical for health security, trade and food systems

Key Challenges

Fragmented systems and infrastructure

Limited technical capacity

Weak data governance

Uneven adoption of digital tools

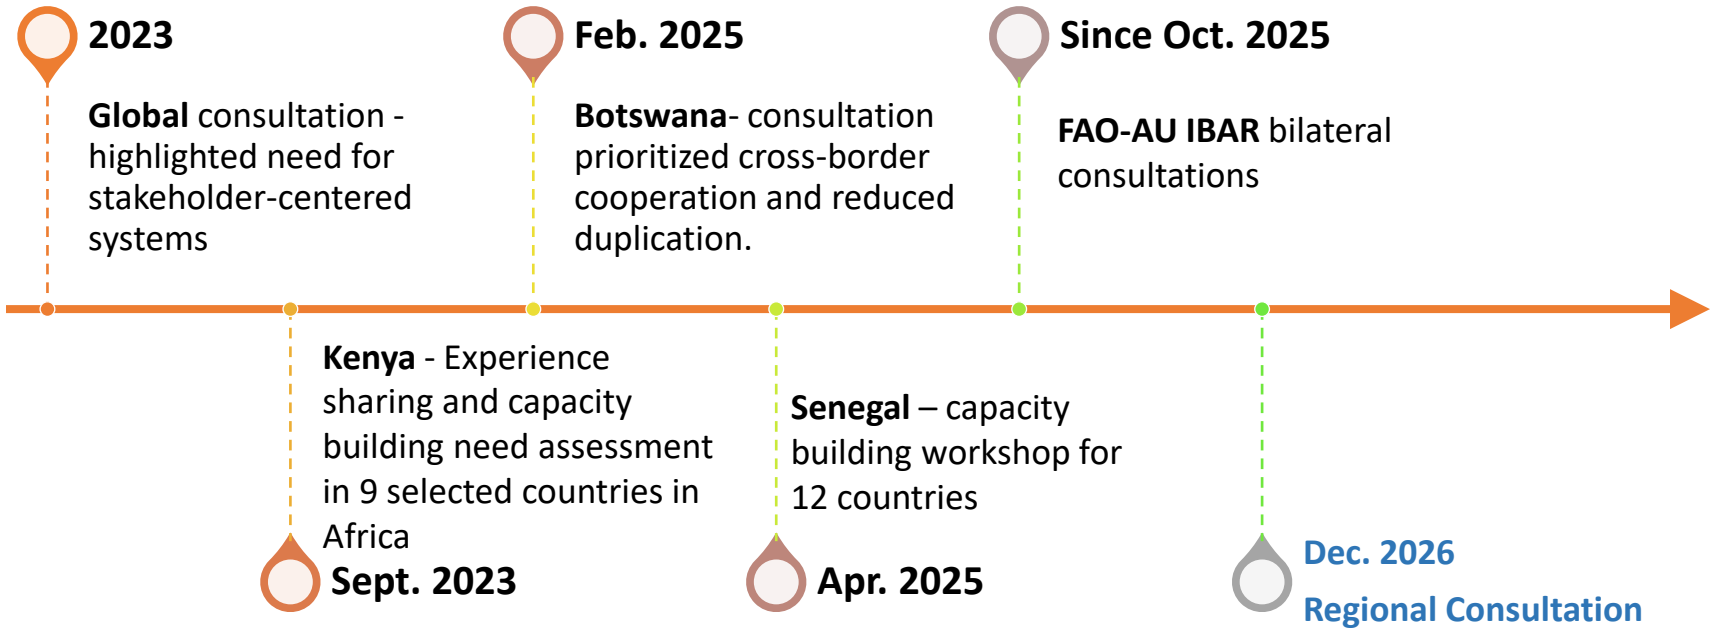
One Health Imperative

Align animal health surveillance with public health digital systems

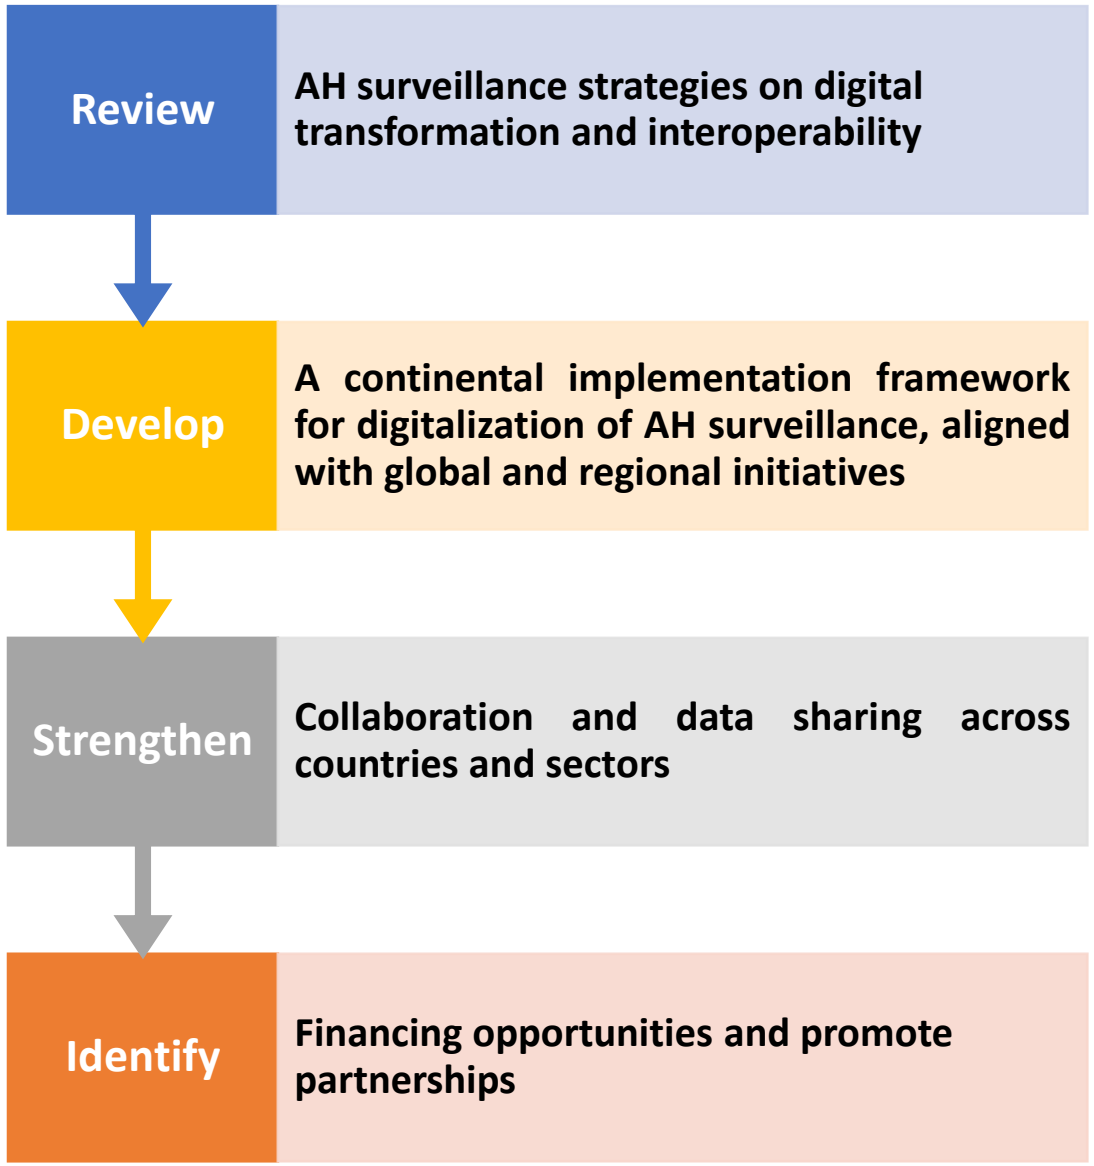
Report zoonotic threats earlier

Enable interoperable platforms and shared standards

Shaping a shared vision



Objectives



Review
AH surveillance strategies on digital transformation and interoperability
Develop
A continental implementation framework for digitalization of AH surveillance, aligned with global and regional initiatives
Strengthen
Collaboration and data sharing across countries and sectors
Identify
Financing opportunities and promote partnerships

Translating vision into action

Stocktaking and shared understanding

Regional framework for digital surveillance

Implementation roadmap

Portfolio of scalable solutions and financing opportunities

Participants

- 80+ participants
- National Governments Representatives
- RECs
- GF-TADs Partner Organizations
- Development partners

The case for active engagement

- **Build consensus on interoperability requirements to enable seamless cross-border data exchange and regional disease intelligence.**
- **Align national systems and priorities with a shared regional digital surveillance architecture and One Health agenda.**
- **Shape and strengthen ownership of the regional implementation roadmap, financing opportunities, investment priorities, and future partnerships.**
- **Ensure diverse country perspectives are reflected, drawing on experiences from different levels of digital surveillance maturity.**

The success of this consultation will be strengthened by the active engagement, experience, and perspectives of Member States and partners across the region.
