The screenshot displays the Apimondia website interface. The central feature is a map of Africa with various countries labeled, including Algeria, Libya, Egypt, Saudi Arabia, Yemen, Oman, India, Mauritania, Mali, Niger, Chad, Sudan, Ethiopia, Somalia, Kenya, Tanzania, Angola, Zambia, Mozambique, Namibia, Zimbabwe, Botswana, South Africa, and Madagascar. The map includes navigation controls like a compass, zoom in (+) and zoom out (-) buttons, and a scale bar for 2000 km. The map is powered by Google and uses data from Tele Atlas. In the top right corner of the map area, there are tabs for 'Karte', 'Satellit', and 'Gelände'. To the left of the map, there is a small image of a beehive and a calendar for June 2011. The calendar shows the 15th as the selected date. Below the calendar is a 'Recent pages' section. On the right side of the page, there are several widgets: 'Classified Ads' with an image of honey jars, a 'Poll' titled 'Honey harvest 2010?' with four radio button options (Excellent, Medium, Small, Nothing) and 'Vote' and 'Results' buttons, and a 'Who's online?' section showing 'We have 117 guests and 1'.
