

PVS Pathway Evolution

Dr John Stratton
PVS Secretary & Deputy Head,
Regional Activities Department,
OIE HQ,
Paris

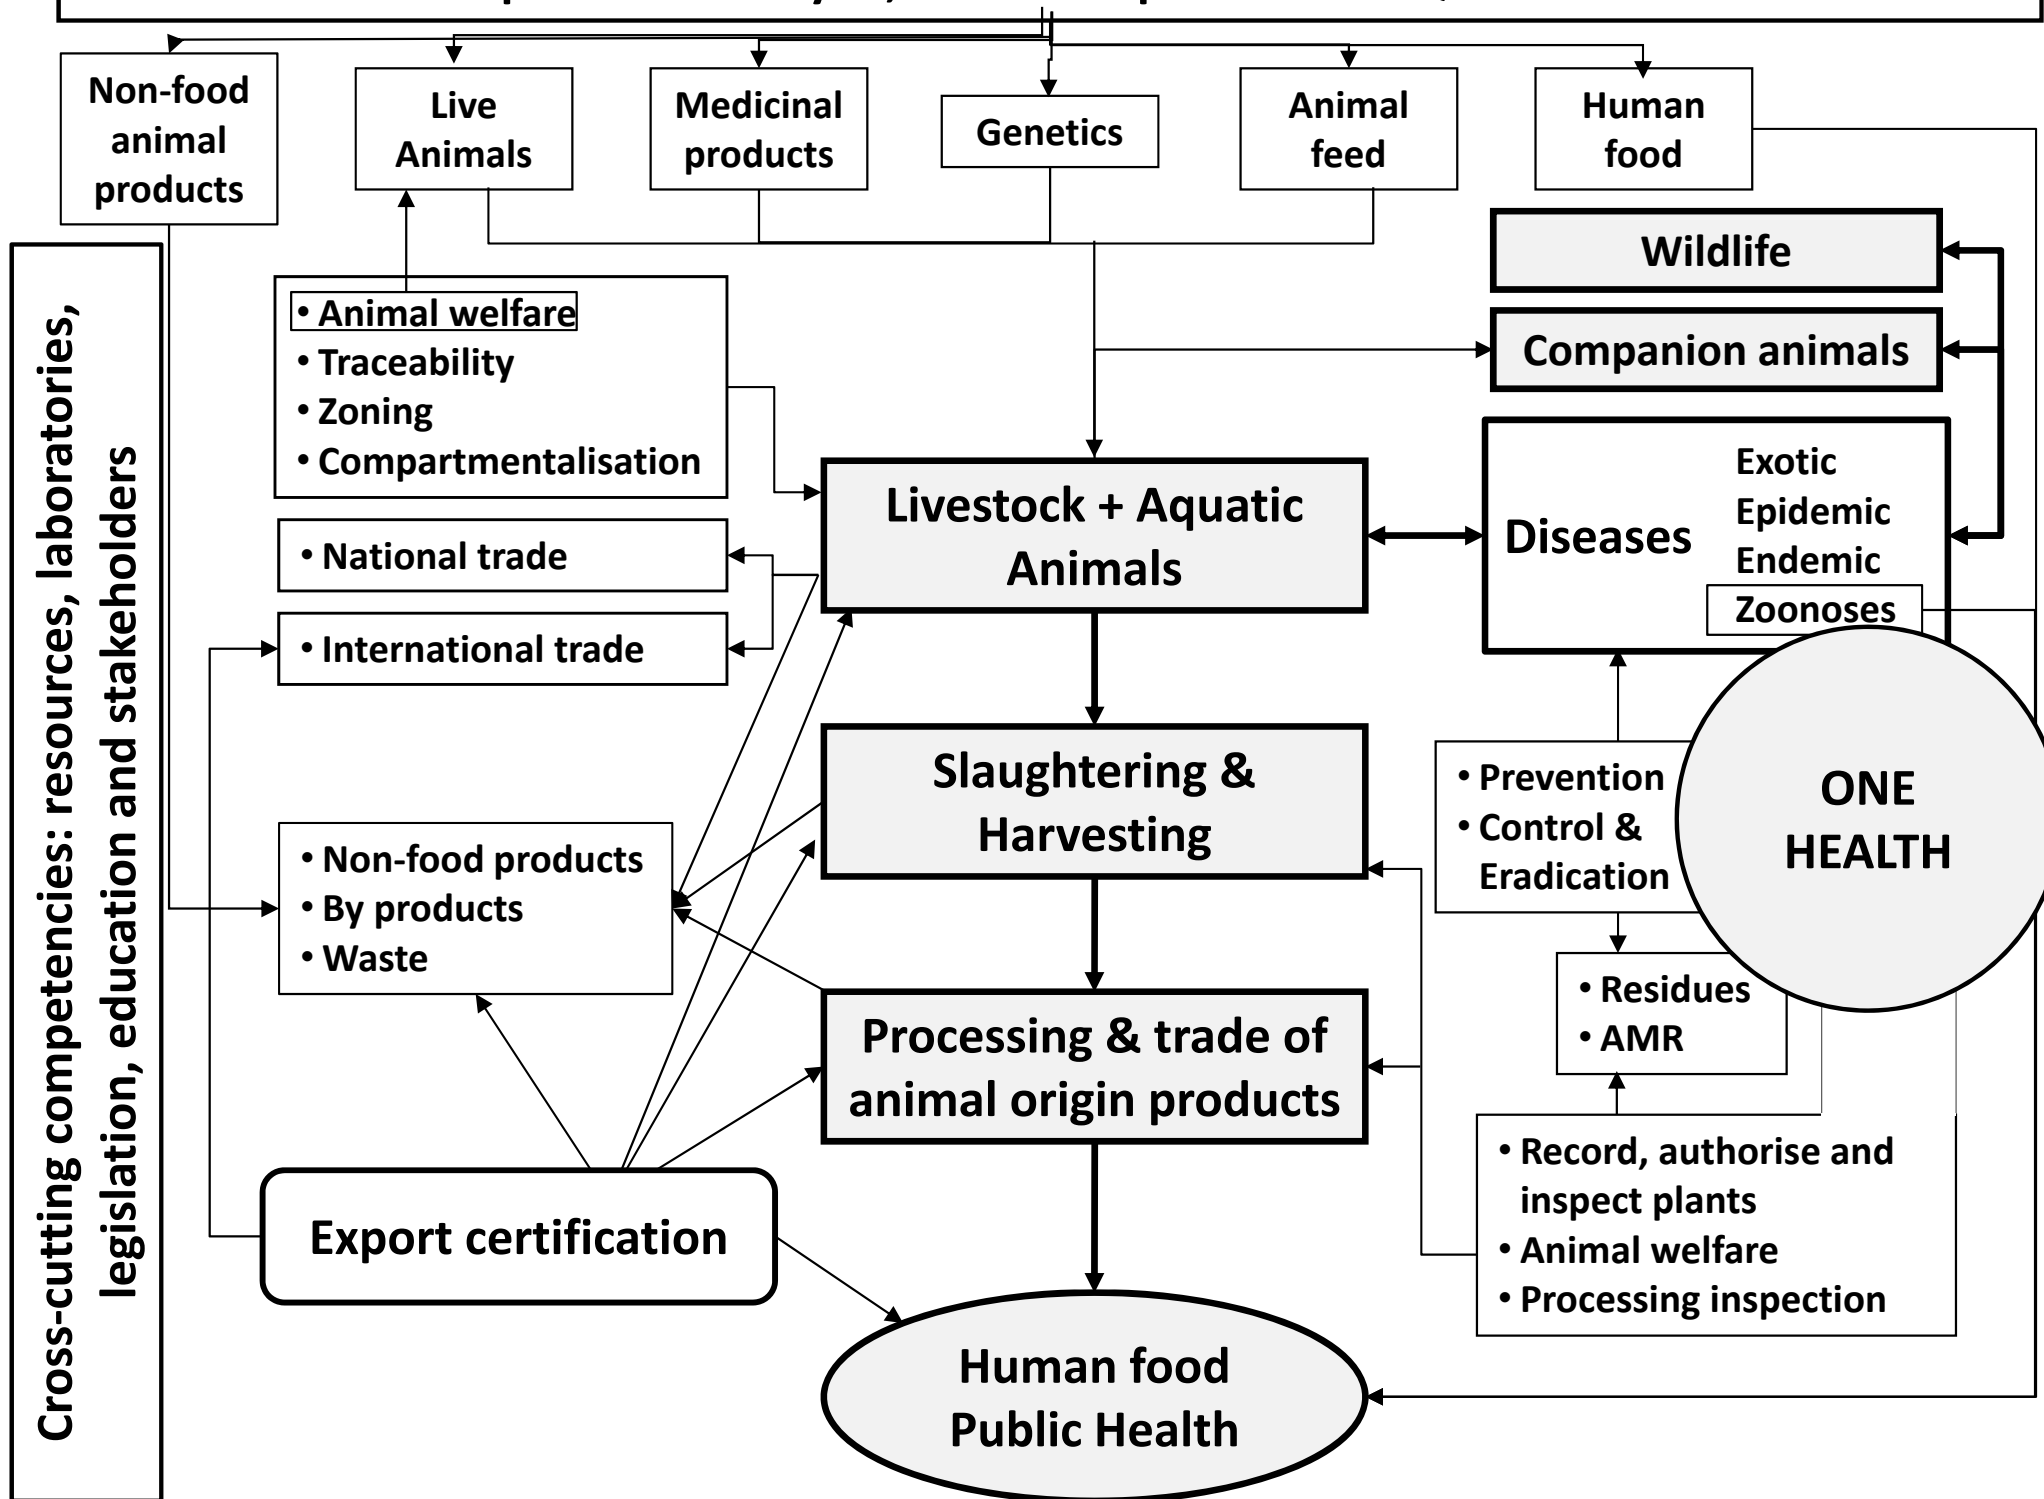

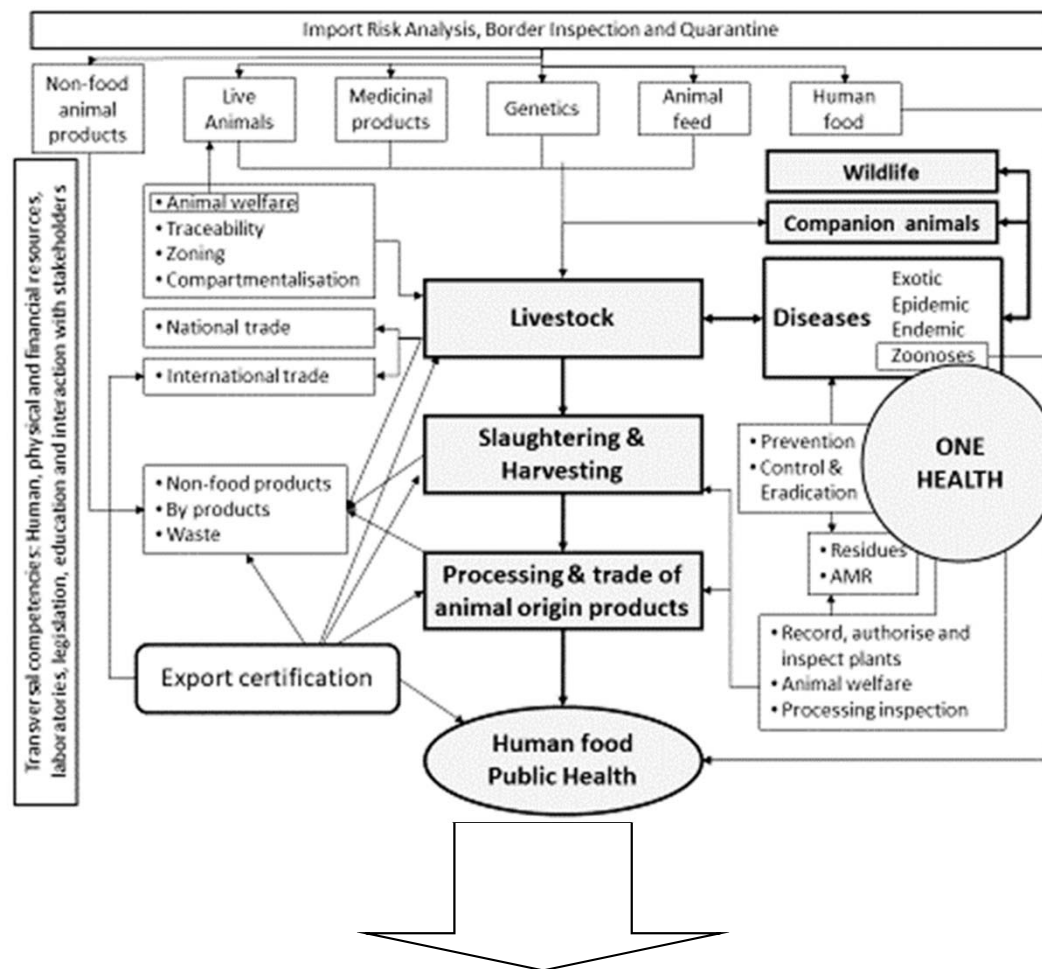

23rd OIE Regional Commission Conference for Africa
26 February to 1 March 2019, Tunis, Tunisia

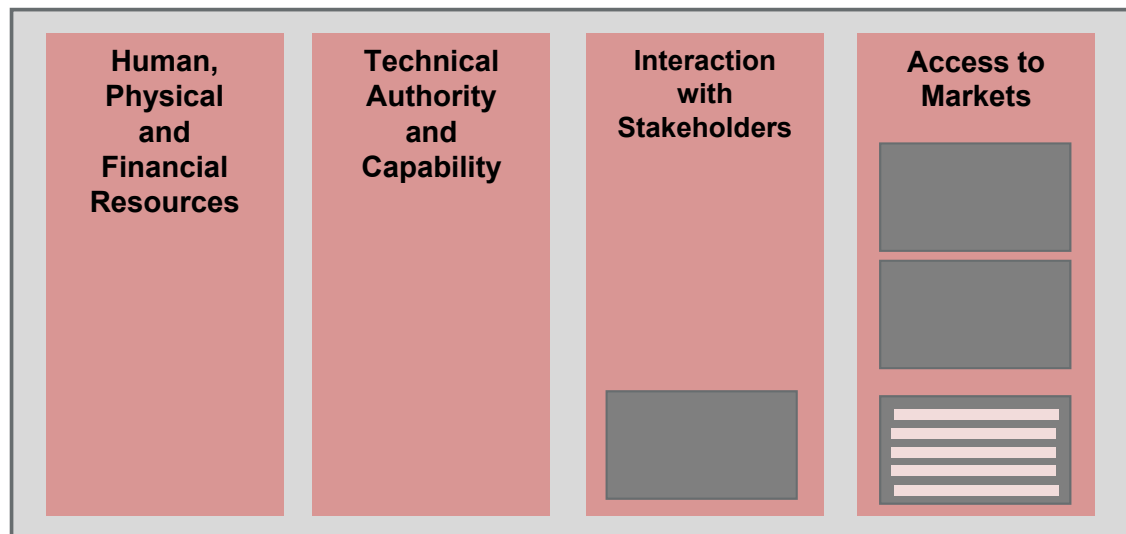

WORLD ORGANISATION FOR ANIMAL HEALTH *Protecting animals, preserving our future*

Import Risk Analysis, Border Inspection and Quarantine

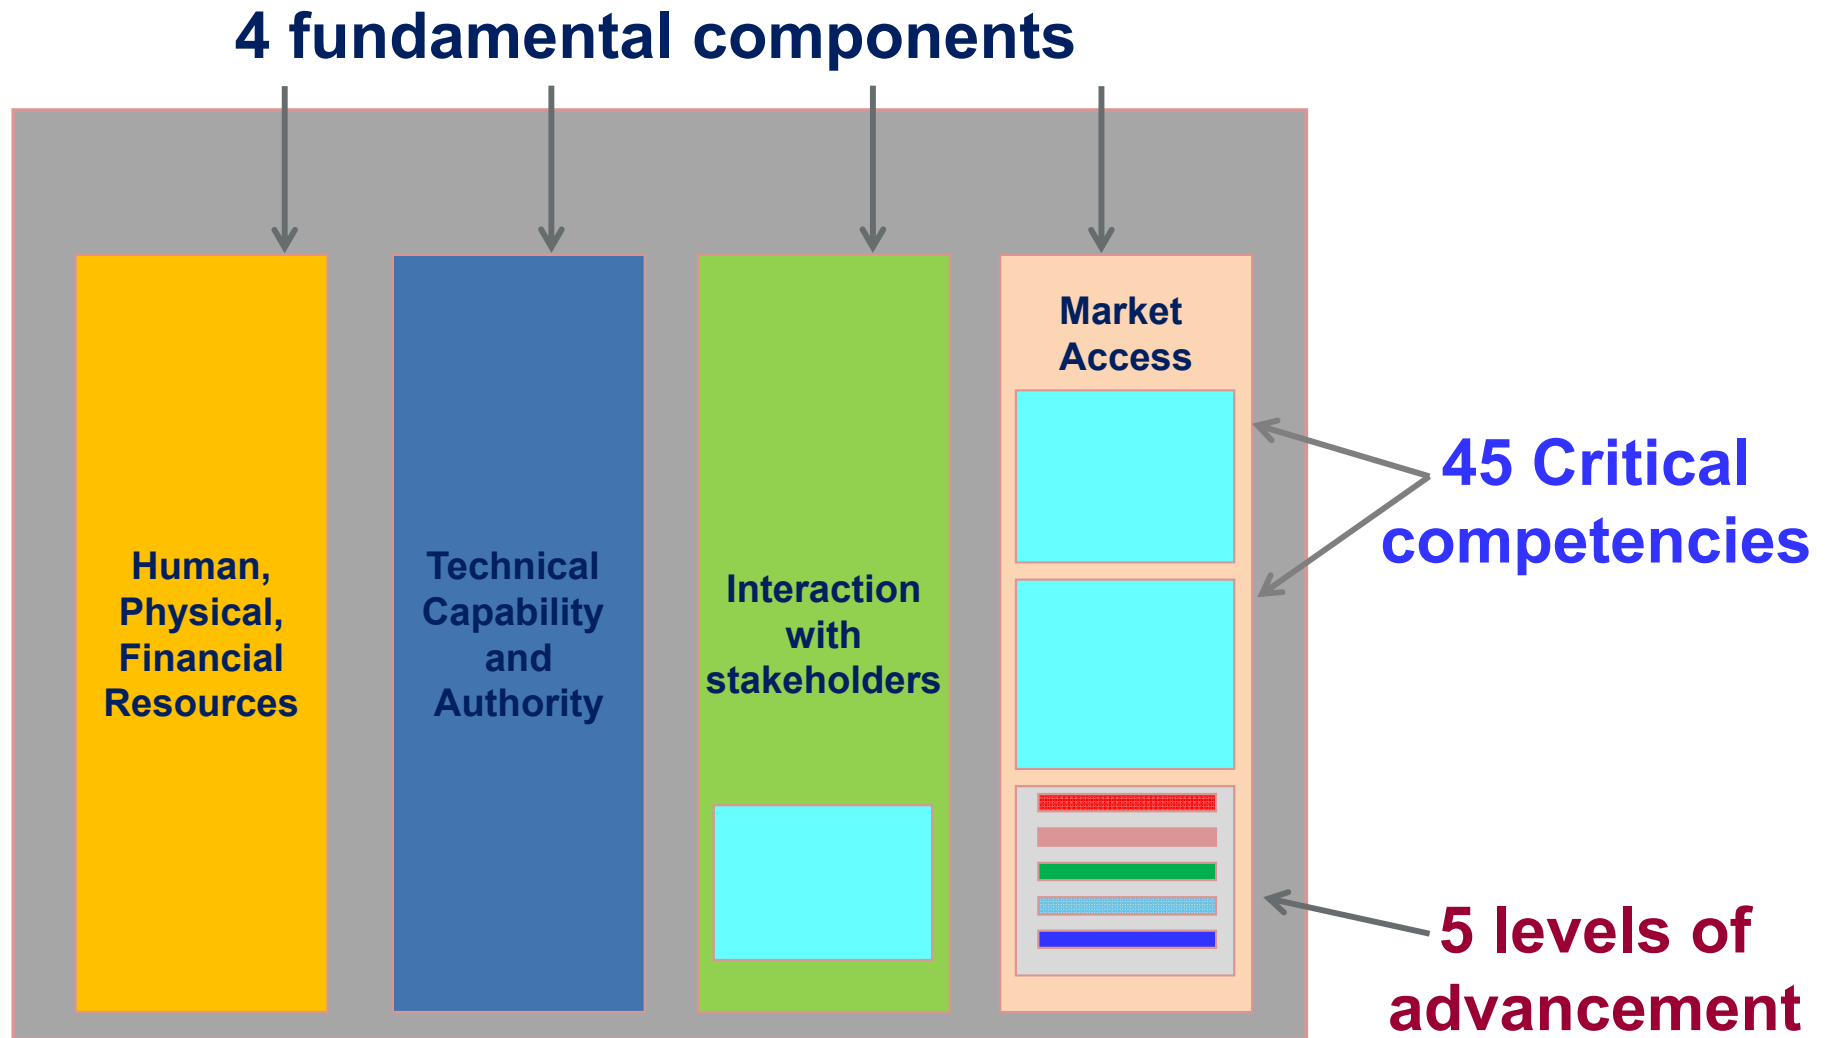

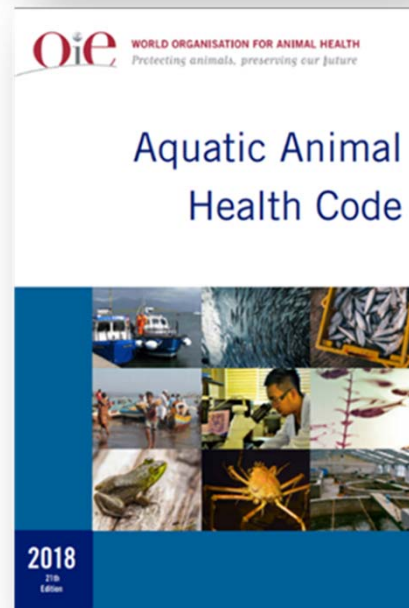

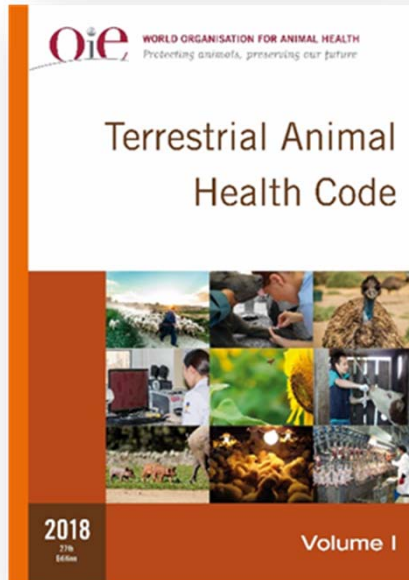

The OIE PVS Tool

Structure of the *OIE PVS Tool*

Aligned with OIE Code, especially Section 3

SECTION 3.

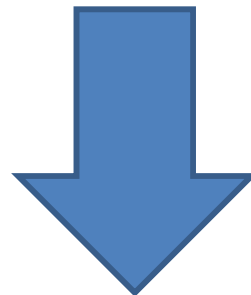

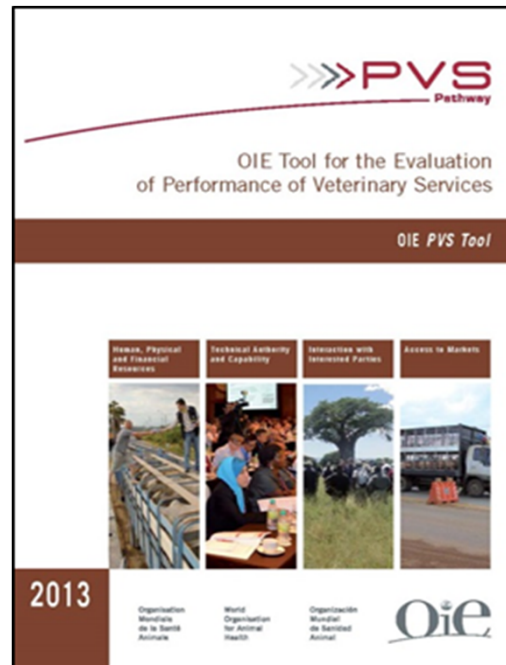

Quality of Veterinary Services

*Update in early
stages.....*

Updated OIE PVS Tool on its way....

**2019, Seventh Edition,
being translated/ published**

OIE PVS Think Tank – 4-6 April 2017

- 10 year anniversary
- Successful - 140 countries, 425 missions
- Biggest risk = complacency
- Think tank- to “evolve” the PVS Pathway
- Highly engaging and successful 3 days
- Keep what has worked, evolve based on lessons learnt.....

What has worked? – TO KEEP!

- independent, external process
- voluntary, country driven process targeting internal systems/resources for sustainability
- effective and efficient tools/methods, with a firm basis in OIE's internationally agreed

What has worked? – TO KEEP! (2)

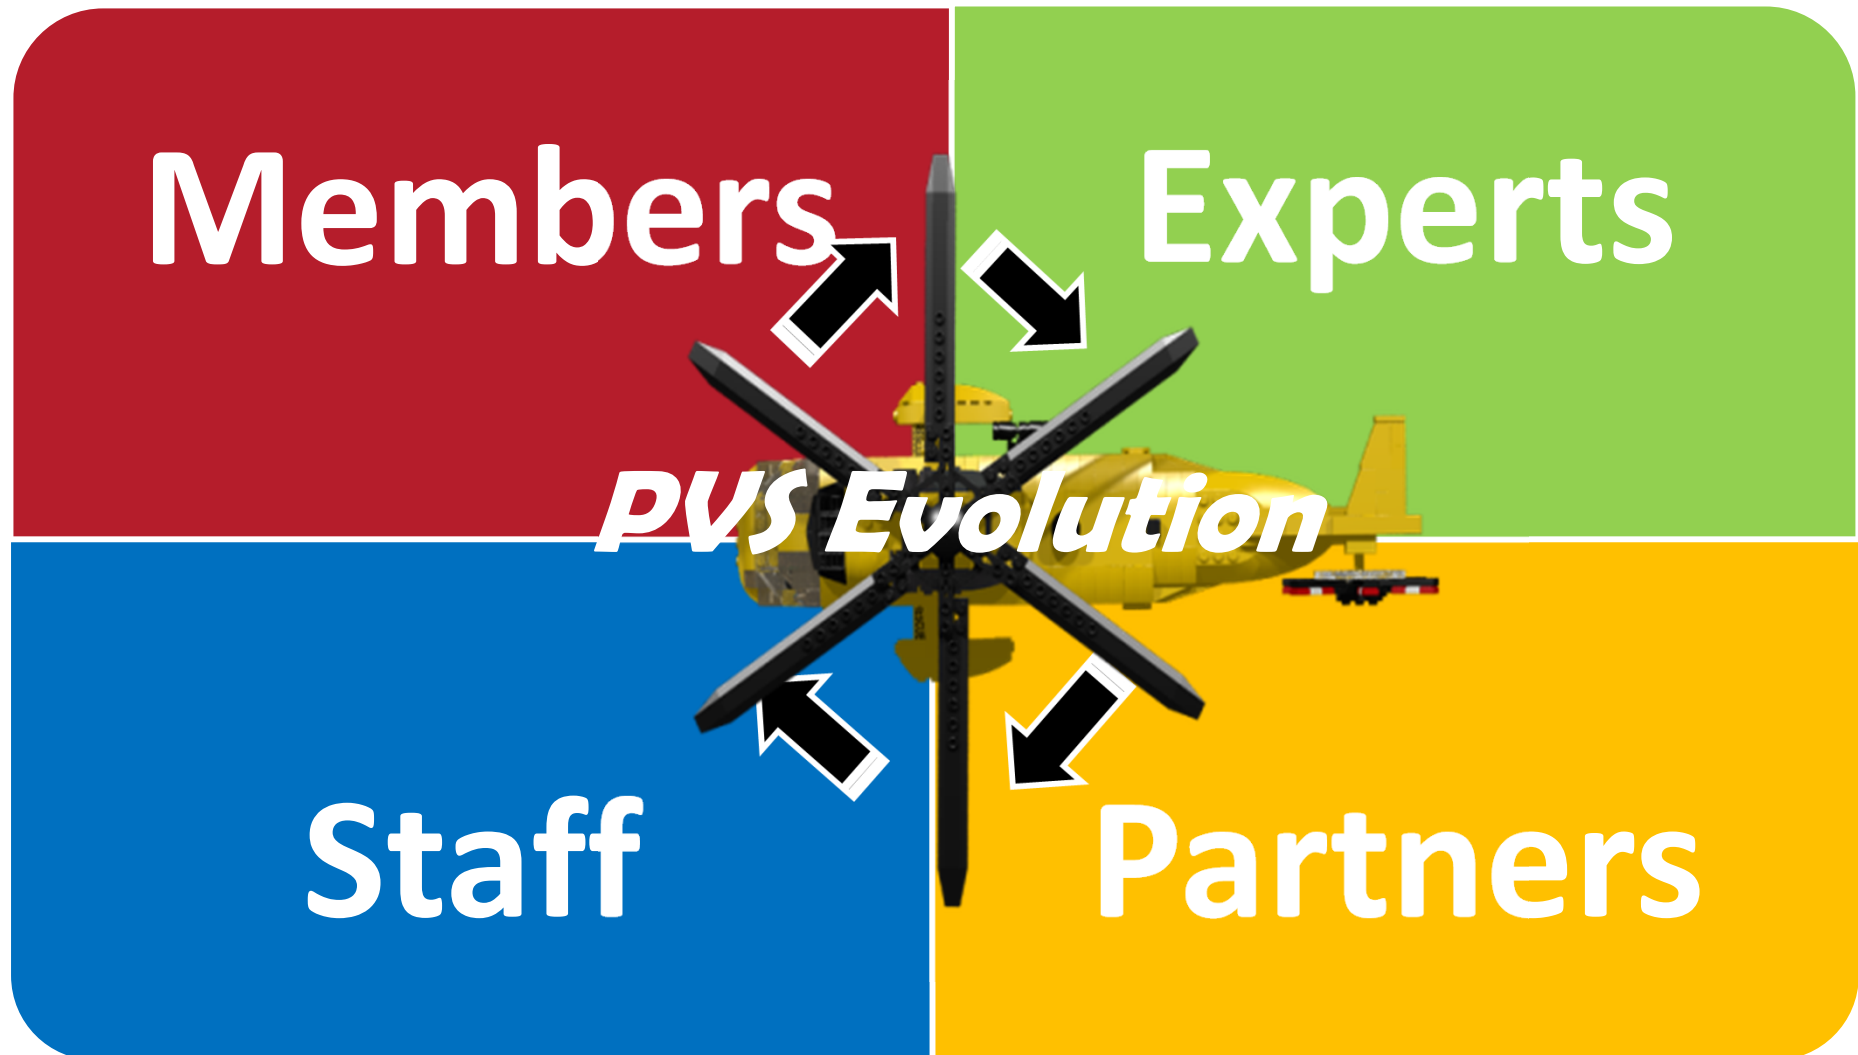

- excellent institutional access via OIE's role & reputation
- a culture of being **participatory, supportive and collaborative**, not directive or presenting a risk
- a properly **broad-based systems approach**, covering **all threats**, including **emerging diseases**

Basic PVS Principles – also to keep!

- > Continuous process to sustainably improve national VS
- > **External and independent:**
 - > Experts **trained and certified** by the OIE
 - > **Based on facts & evidence**, not impressions
- > Official request from OIE National Delegate => **voluntary**
- > Purpose:
 - > Assess **compliance with OIE standards** via PVS Tool
 - > Identify strengths / weaknesses and **areas for improvements**
- > **Reports = country property** (confidentiality of results, unless agreed)
- > **Supportive** not directive, strong platform for **planning & advocacy**
- > Capture better the **real impacts** in improved budgets, staffing, infrastructure, governance arrangements, technical capacity etc in many countries (see business case for examples)

PVS Evolution Stakeholder Groupings – all views count!

Main Thinktank Findings:

GROUP	RECOMMENDATIONS	KEY OUTPUT
Partners	Raise profile, align to global agendas, make the case	PVS Business Case, one pager
Staff	Broaden OIE ownership and use	Staff training, official recog'n, WAHIS, Code, AMR
Experts	Refine methods and training	Update Tool/Code Advanced Training
<u>Members</u>	<u>Deepen and tailor engagement</u>	<u>Updated PVS Cycle with new options</u>

PVS Pathway Evolution

- Key theme for Member Countries:

“To enhance country PVS Pathway understanding, ownership and engagement” and

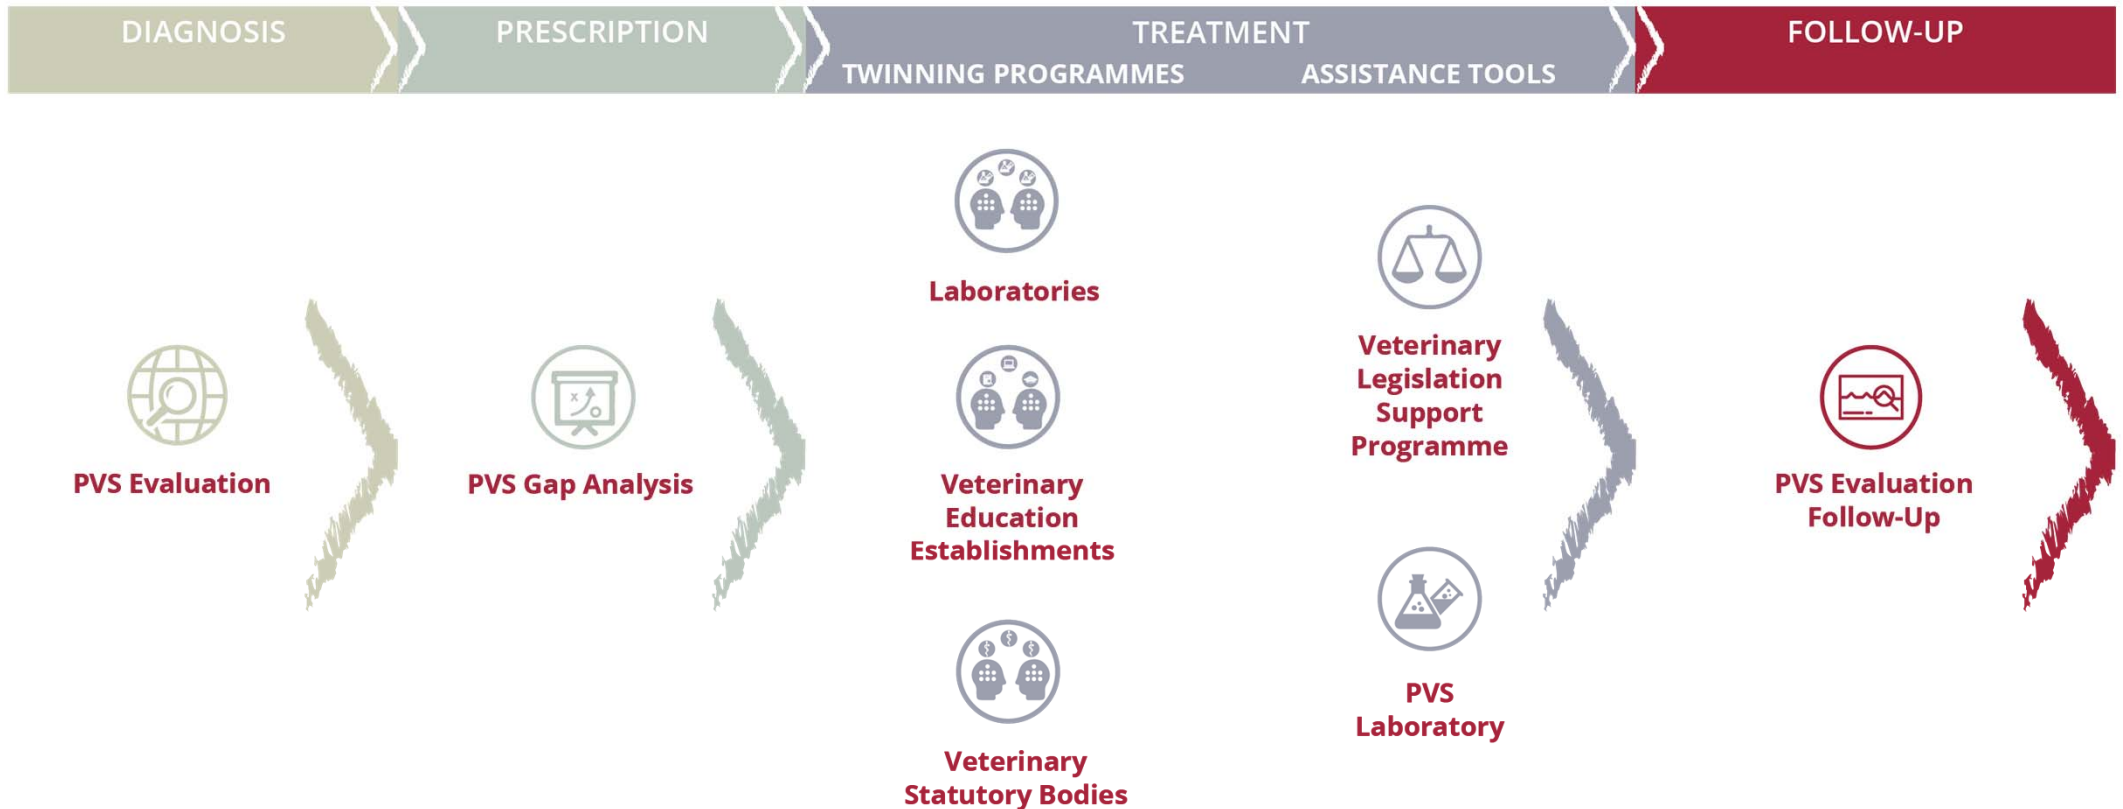

“To provide options to tailor engagement based on governance needs and/or technical needs”

Aligns with 3 key OIE themes mentioned by the OIE President’s opening speech yesterday –

ENGAGEMENT, GOVERNANCE, AND ADVOCACY

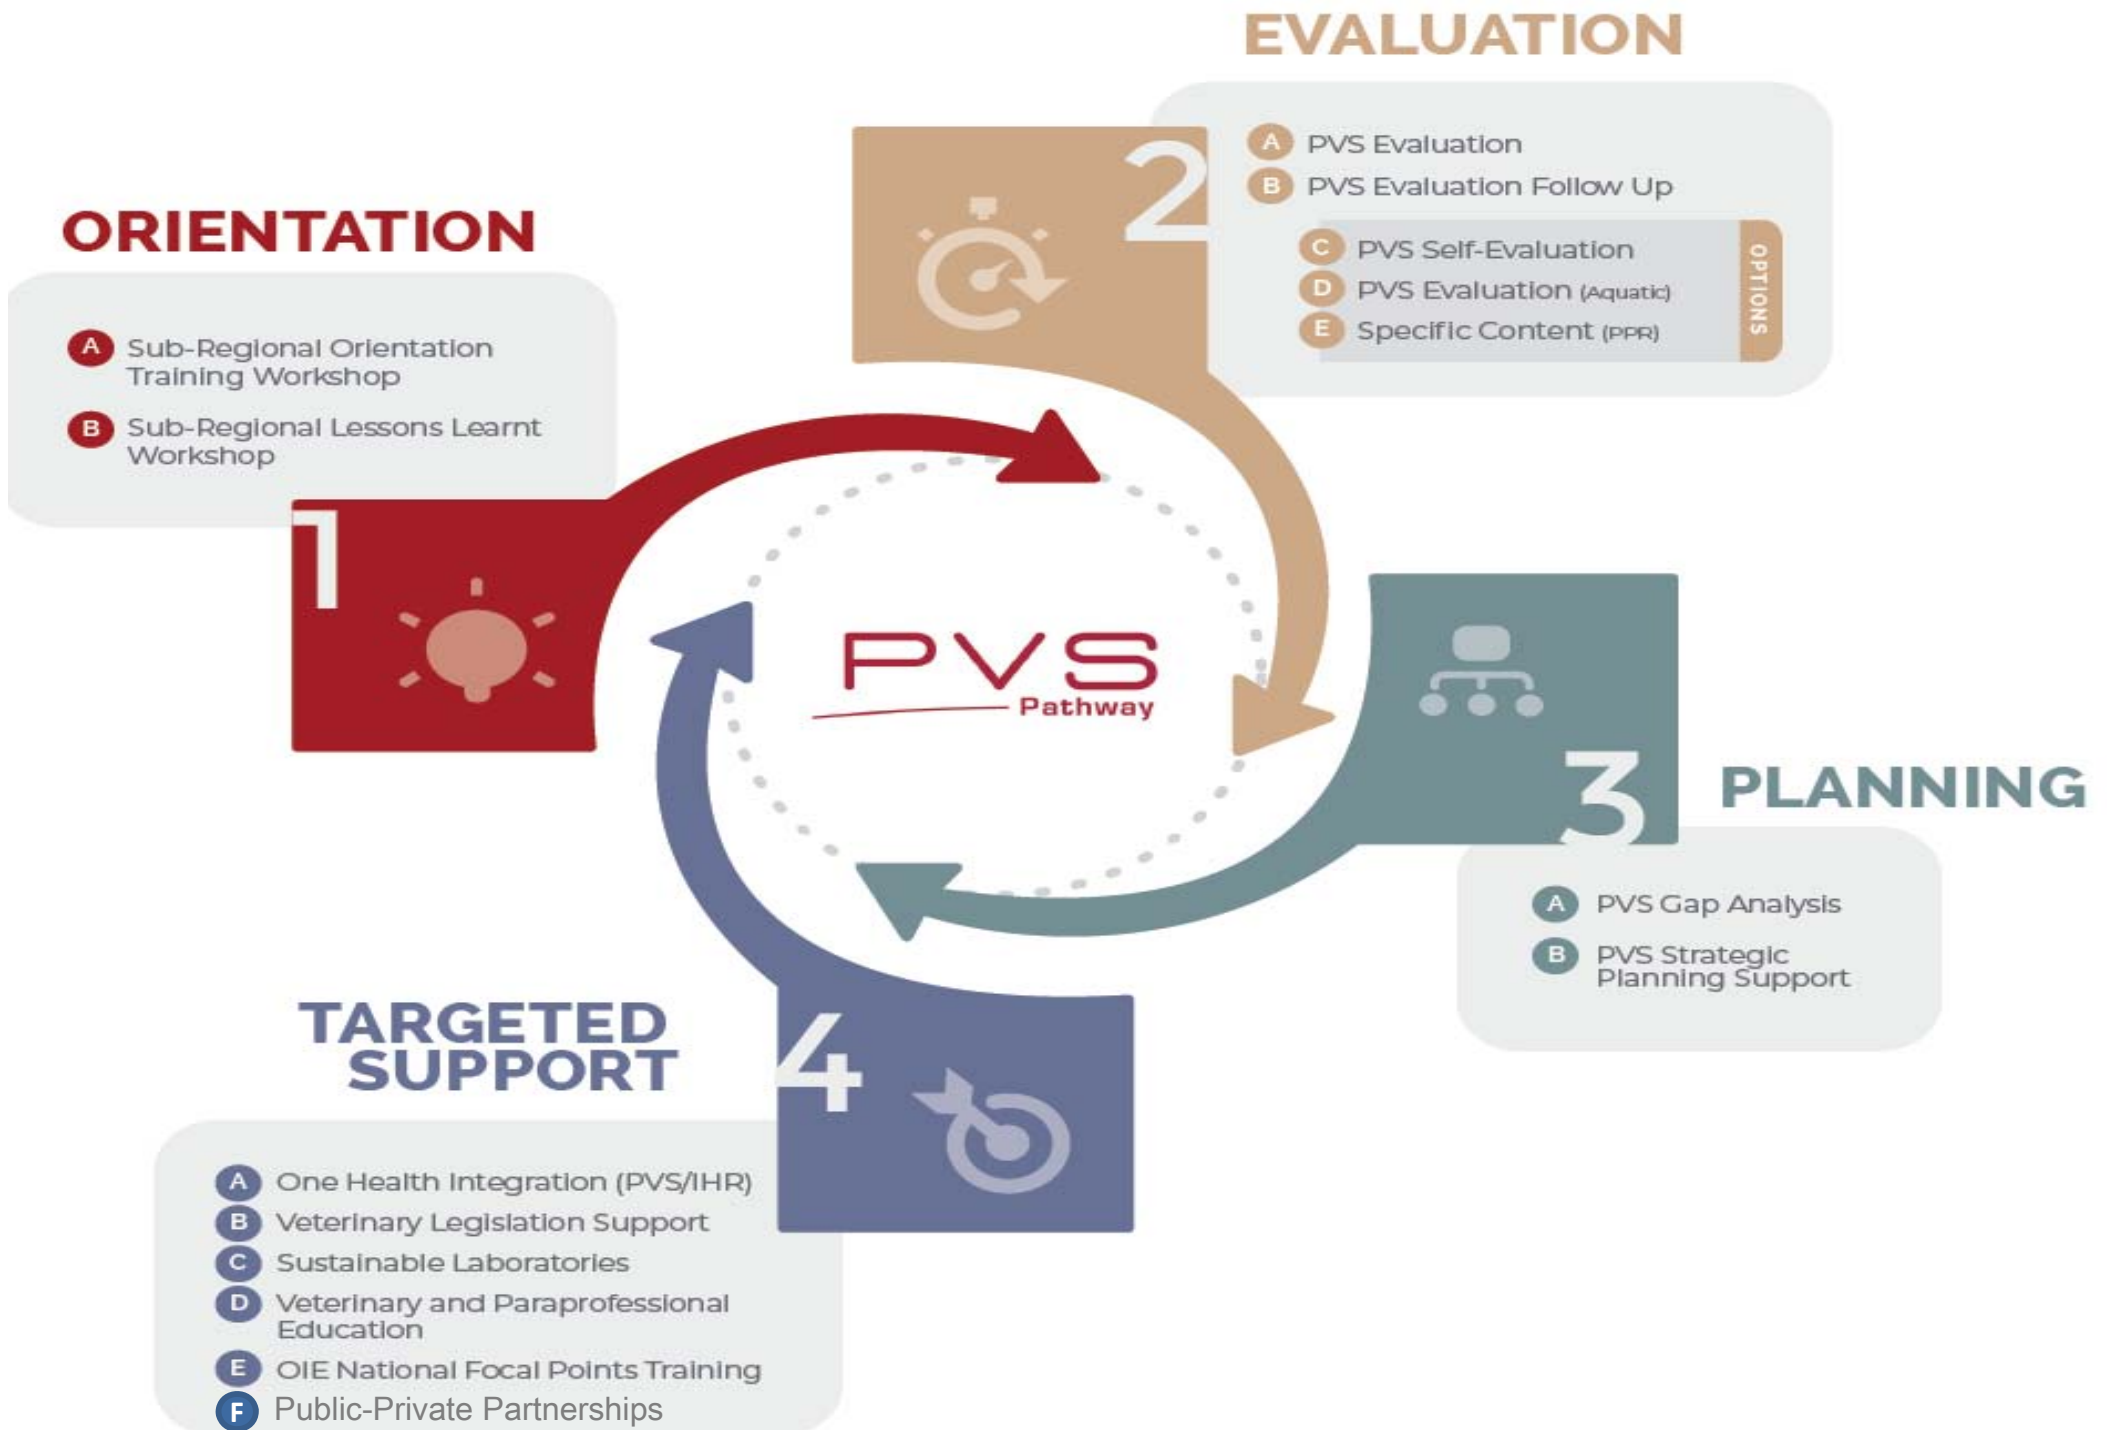

BUT HOW?

from.....
OIE PVS Pathway Arrow

The OIE collaborates with governments, donors and other stakeholders

to the brand new..... PVS Pathway Cycle

ORIENTATION

- A Sub-Regional Orientation Training Workshop
- B Sub-Regional Lessons Learnt Workshop

PVSE
Pathwa

1. Orientation – new stage!

OIE's Orientation Training Objectives:

- 1.** Enhance country understanding/ownership/engagement
- 2.** Improve preparation, conduct and use of PVS
- 3.** Potentiate PVS self-evaluation
- 4.** Develop national PVS specialists/contacts + sub-regional network >> re-orientation & lessons learnt
- 5.** New PVS experts for the OIE – balance our pool

Day 1- Theory >

Day 2- Practical >

Day 3- Planning...

PVS Evolution – Orientation stage

- Key theme for Member Countries:

“To enhance country PVS Pathway understanding, engagement, ownership and use” and

“To provide options to tailor engagement based on governance and/or technical needs”

HOW?

=TRAINING VS TO “DEMYSTIFY” PVS

+ SUB-REGIONAL PVS APPROACH

EVALUATION

2

- A PVS Evaluation
- B PVS Evaluation Follow Up
- C PVS Self-Evaluation
- D PVS Evaluation (Aquatic)
- E Specific Content (PPR, AMR)

OPTIONS

2. Evaluation (new options)

2c) PVS Self Evaluation:

- Always available, now formal OIE option
- OIE support via training – sub-regional
- National training may be possible if committed to self-evaluation i.e. decentralised level
- Tool adapted to sub-national application, teams and timing up to country
- The OIE, or any other external agency, NOT involved in the mission or report
- PROS - greater detail, ongoing monitoring, flexibility & control
- CONS – objectivity, engagement outside of VA

2. Evaluation (new options)

2e) PVS Specific Content:

- **Links PVS systems focus to a real life priority issue or disease, demonstrating applicability**
- **AMR different approach >> TOOL Competency**
- **PPR method piloted, finalised & being rolled out - LINKS TO PMAT**
- **Rabies method being developed, looking for 1st pilot - LINKS TO SARE**
- **PVS Evaluation and report completed in full:**
 - **Topic specialist on team**
 - **Dedicated day**
 - **Annex to report.....**

(Generic)
definition of the
CC according to
the OIE PVS Tool

(Contextualized)
definition of the
CC in the context
of the PVS-PPR

'Generic' level of advancement
granted in the framework of
the OIE PVS mission [add
date]

CC1.1.A	The appropriate staffing of the VS to allow for veterinary and technical functions to be undertaken efficiently and effectively	3
	The appropriate staffing of the VS to allow for PPR prevention and control to be undertaken efficiently and effectively	
	<i>Level 3 [The majority of veterinary and other professional positions are occupied by appropriately qualified personnel at local (field) levels (for appropriate PPR prevention and control activities)] is required for Stage 2</i>	X

Required Level of advancement
(LoA) for this CC, to ensure
minimum/ sufficient capacity to
prevent and control PPR, as
stated in the GCES

Appreciation of the
'contextualized' level
of advancement in the
context of the PVS-
PPR

Indication if the
required level is reached

✓ reached

✗ not reached (in this
case, recommendations
provided should be
implemented)

-1, -2 means the PPR LoA is less than the Generic LoA by 1 or 2

ND means the PPR LoA is no different than the Generic LoA

+1, +2 means the PPR LoA is better than the Generic LoA by 1 or 2

PVS Evolution – Evaluation stage

- Key theme for Member Countries:

“To enhance country PVS Pathway understanding, ownership and engagement, and

“To provide options to tailor engagement based on governance and/or technical needs”

HOW?

= PVS SELF-EVALUATION 

+ PVS SPECIFIC CONTENT 

IS
- Pathway

3

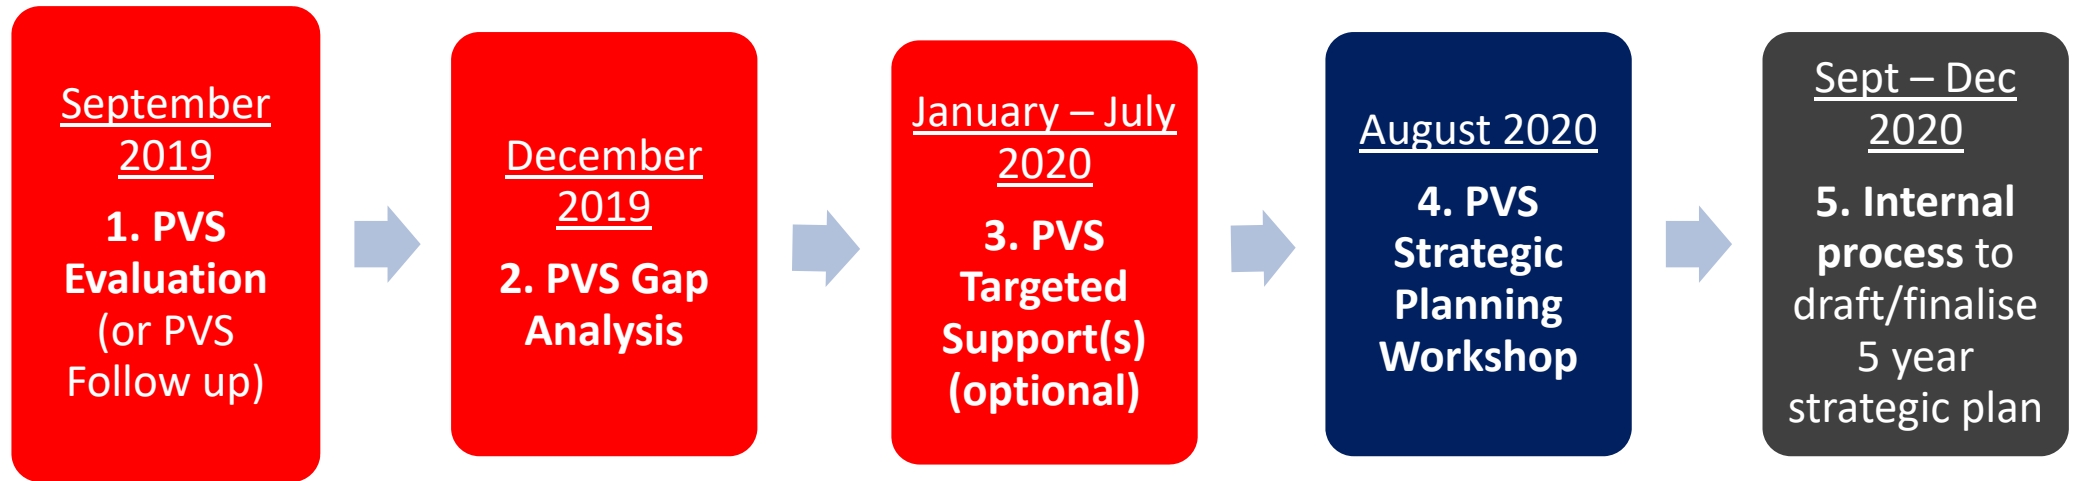

PLANNING

- A PVS Gap Analysis
- B PVS Strategic Planning Support**

3: PVS Strategic Planning Support (new)

- PVS Gap - OIE team working with a country's Veterinary Authority to develop a detailed VS strategy over five years
- Some countries find it difficult to use - issues with formatting, interpretation, translation, tasking...
- Many countries have a formal strategic planning cycle for Veterinary Authority or relevant sector, but many don't...
- Logical to link the two - opportunity of PVS support to initiate 5 year strategic planning cycle or update existing cycle
- PVS provides holistic and comprehensive inputs/process – via a template approach

Example of PVS Pathway strategic planning partnership process

Red – OIE led stage

Blue – OIE/country shared leadership

Grey – Country led stage

PVS Evolution – Evaluation stage

- Key theme for Member Countries:

“To enhance country PVS Pathway understanding, ownership and engagement, and

“To provide options to tailor engagement based on governance and/or technical needs”

HOW?

= PVS STRATEGIC PLANNING 

TARGETED SUPPORT

4

- A One Health Integration (PVS/IHR)
- B Veterinary Legislation Support
- C Sustainable Laboratories
- D Veterinary and Para-professional Education
- E OIE National Focal Points Training
- F Public-Private Partnerships

4A: OIE PVS and WHO IHR One Health Linkages

‘*Equivalent*’ systems targeting international:

animal health

&

public health

4B: Veterinary Legislation + 4C: Sustainable Labs + 4D: Vet/VPP education + 4E: Focal Points training

- VLSP – ongoing, provides focused support in key areas e.g. VSB/VPPs, AMR, Biothreats
- Sustainable Labs – balances personnel, infrastructure, equipment, operating, sampling costs with national VS needs
- Vet education/VPPs – covered at workshop on Mon & Johan Oosthuizen yesterday
- National Focal Points – biannual training model, currently being reviewed

4F: Public Private Partnerships

- Consultative process to develop OIE Guidelines for PPPs in the veterinary domain
- Identifies 3 types of PPPs – transactional, collaborative, transformative
- Structured as: 1. Strategic rationale, 2. Executive briefing and 3. Implementation guide. Includes case studies, ethical charter, enabling environment....
- Will be finalised and launched at OIE GS this year
- Sub-regional OIE PPP workshops planned in Africa; Addis Ababa – July 2019 and Tunis - Sept 2019

PVS Evolution – Targeted Support stage

- Key theme for Member Countries:

“To enhance country PVS Pathway understanding, ownership and engagement, and

“To provide options to tailor engagement based on governance and/or technical needs”

HOW?

= PVS TARGETED SUPPORT OPTIONS

(PVS/IHR, VLSP, Lab, VEE/VPPs, FPs, PPPs)

STRENGTHENING VETERINARY SERVICES THROUGH THE OIE PVS PATHWAY

THE CASE FOR ENGAGEMENT AND INVESTMENT

FEBRUARY 2019

STRENGTHENING VETERINARY SERVICES THROUGH THE OIE PVS PATHWAY

Veterinary Services are a **global public good**, minimising transboundary disease spread and facilitating safe trade, and are therefore worthy of sustainable investment by all governments and the international community.

Livestock and Veterinary Services are **chronically under-resourced** against all comparative measures.

Veterinary Services make a vital contribution to global health security in areas such as emerging zoonoses, antimicrobial resistance and food safety, by addressing "risk at source" for most major infectious threats, including those with pandemic potential.

The OIE is a unique intergovernmental organisation with key attributes as a partner in strengthening Veterinary Services, at global, regional or national levels.

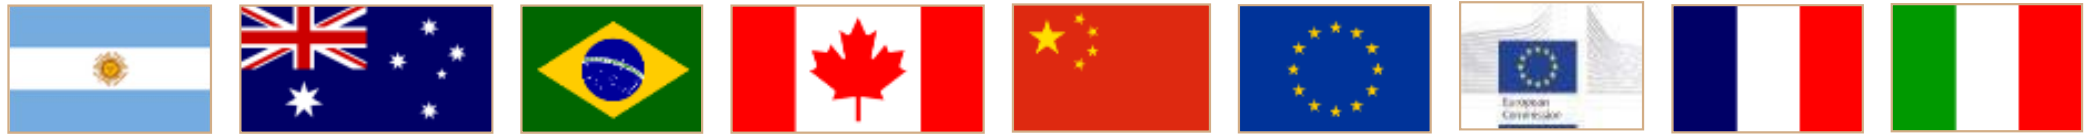

Veterinary Services make a vital global contribution to food security, nutrition, poverty alleviation and resilience, given the number of poor rural communities that rely on livestock for their economic livelihoods and as a food source.

The OIE has a proven track record in strengthening Veterinary Services, particularly over the last decade through its flagship **OIE PVS Pathway programme**, which has recently undergone a careful 'renovation' for the future.

Your further support as a valued OIE delegate, partner or stakeholder will help the OIE and its Member Countries to carry on and expand our good progress in strengthening Veterinary Services, as a global public good.

Donors and Partners – OIE World Fund
