Future steps

Recommendation n°4 of the 2nd OIE Global Conference on Antimicrobial Resistance – October 2018

To further develop the OIE data collection on Antimicrobial Agents Intended for Use in Animals, **converting the current spreadsheet format to a database system**, able to accommodate data submissions by animal species, and its connection to the World Animal Health Information System (WAHIS) and also allowing addition of data from field studies

Project Overview

Set up a tool to collect data from the Member Countries to the OIE Annual Data Collection on AMU

Involving the Member Countries in the development to have a tailored tool to their needs

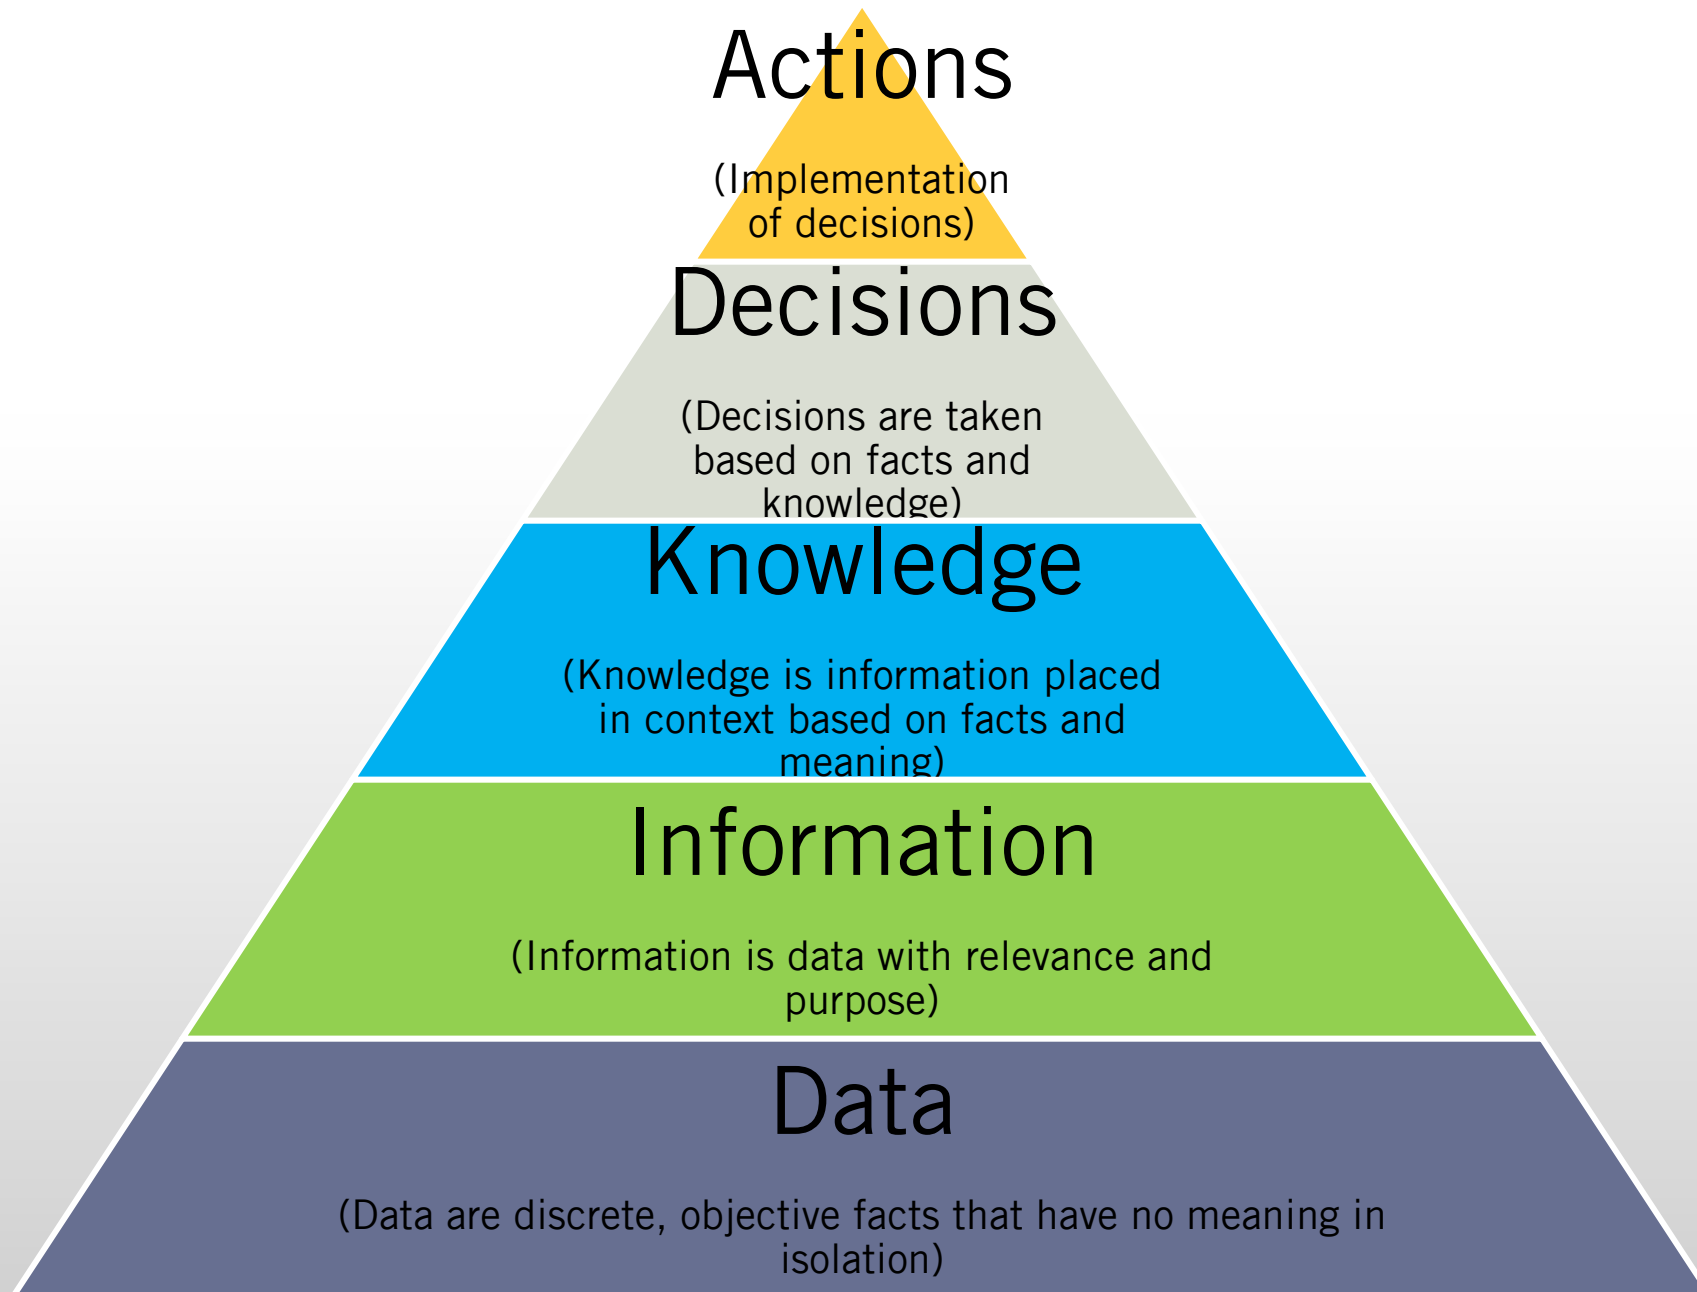

Evaluate numbers calculated by the Countries, and detect if errors occurred

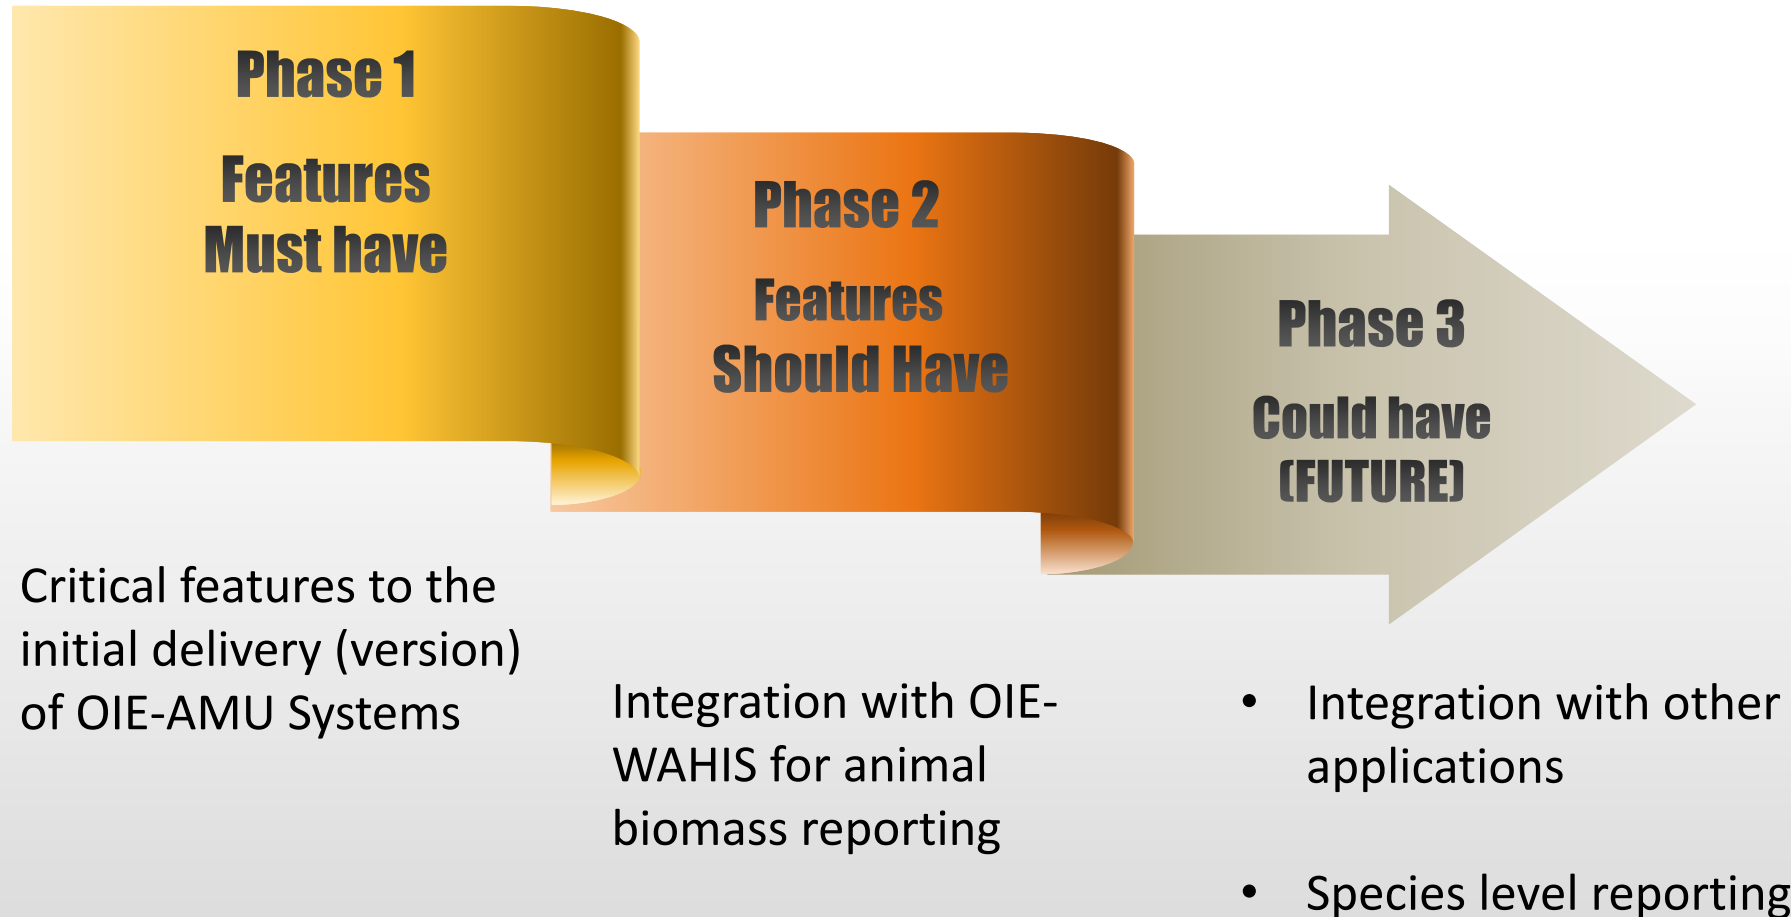

Improving the Member Countries' ownership of their AMU data

From data analysis to decisions and actions

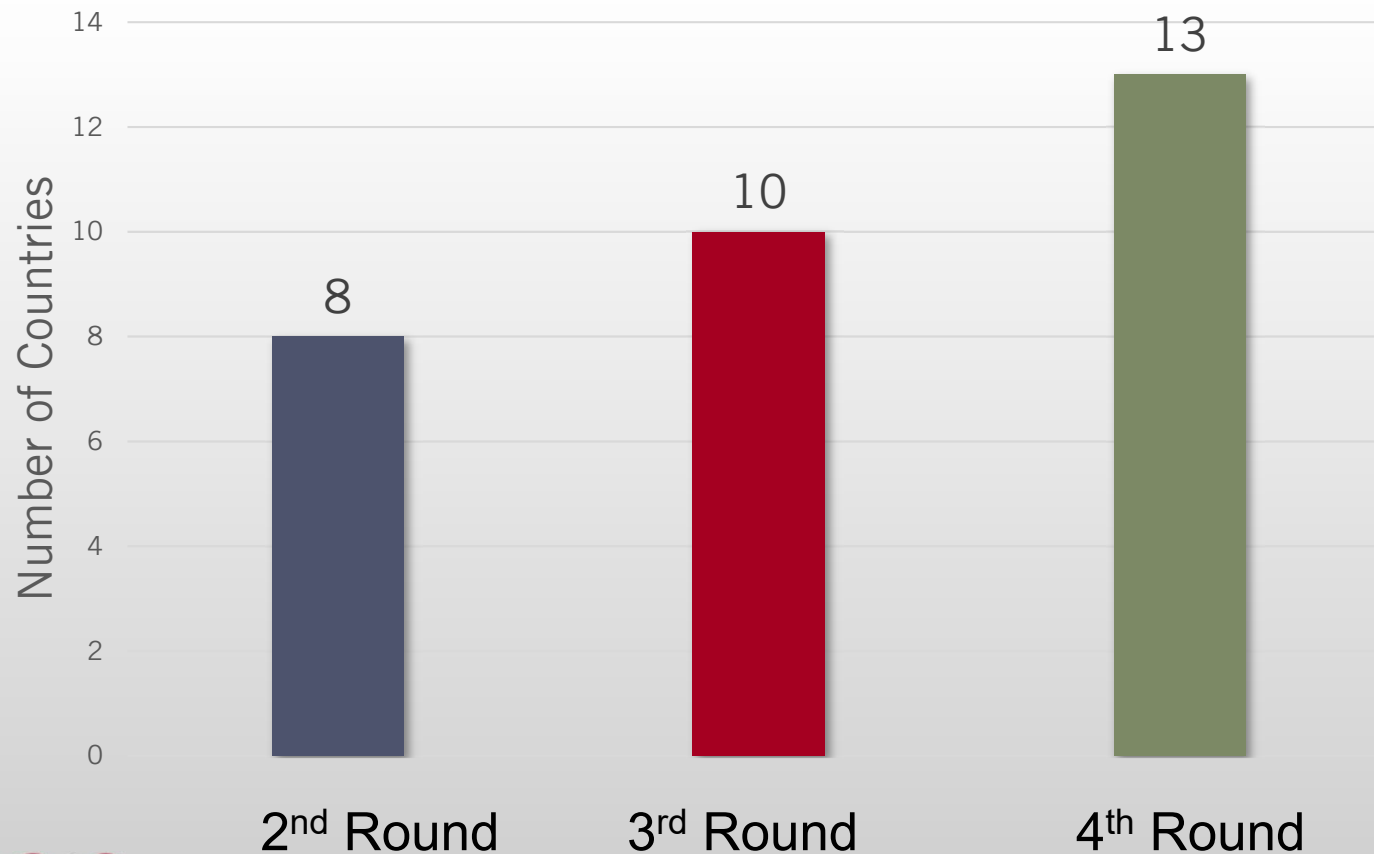

Development Phases and Milestones

Tailored to the countries' needs

Barriers to report quantitative data for countries
(Lack of tools and human resources)

Tailored to the countries' needs

We will use the workshop group sessions for needs assessments

AMU Reporting Online

Countries will be able to see and update previous reports

The online questionnaire will have the same format as the current OIE Template in Microsoft Excel

DG3
DG4

Countries will always have the possibility to continue using the Excel files

Diapositive 9

DG3

Could give the wrong idea that is only only, but we will the excel files if they want to use them, right?

Delfy Gochez; 12/09/2019

DG4

Maybe could we clearly explain what is our vision on how countries can send their data? For example, OIE Template (Baseline information + Rep. Op. 1, 2 and 3) directly submitted on the software or through Excel to the Software. In addition, there will be support on for the calculations and will function the same way directly through the software or through Excel.

Delfy Gochez; 12/09/2019

DG5

I have taken this from the 2.1.2 Data input by countries of the Requirement document, maybe you could add other things related to the point 2?

Delfy Gochez; 12/09/2019

AMU Reporting Possibilities

OIE Template (Baseline information + Reporting Options 1, 2 and 3) directly submitted in the system

Excel Template uploaded to the database

Integrated calculation tool for active ingredients

AMU Database

Data Privacy and Security

- Countries will have complete control over data protection and regulation
- Adoption of best practices:
 - ✓ ISO 27001 Information System Standard
 - ✓ General Data Protection Regulation

AMU System Accessibility

- Cloud based and accessible worldwide

- Accessible through various devices

Benefits – Help with AMU calculations

DG1
MM7

- Formulas to be integrated in the system

Diapositive 13

DG1

I took out the pig image as it might create the idea that we are filling animals with antibiotics and that they (pharmaceuticals or veterinarians) are the main problem of AMR at global level. Maybe you can use an image of someone working on their data? I have put an image that we used in the General Session from 2017.

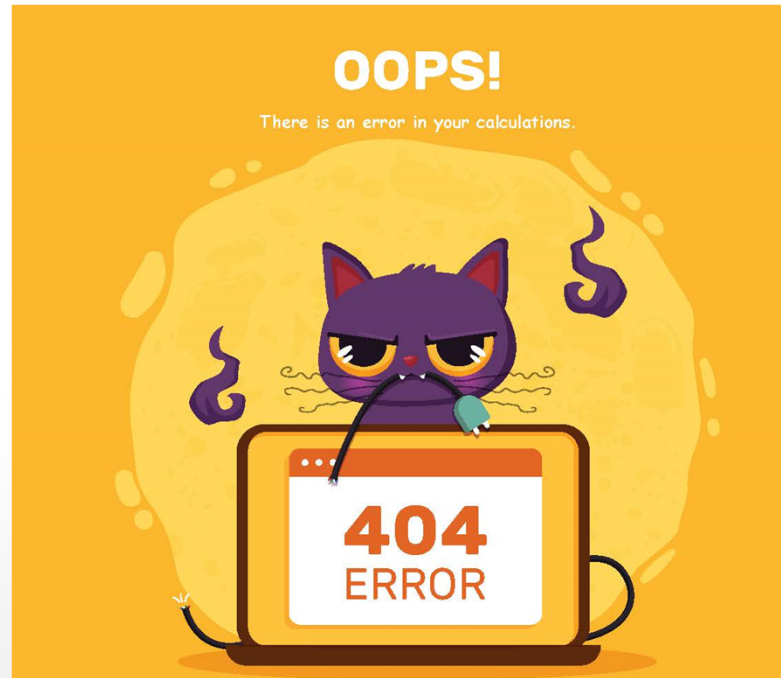

Delfy Gochez; 12/09/2019

MM7

Thank you for that

Mduduzi Welcome Magongo; 12/09/2019

Benefits – Error detection

Business Intelligence tool:

- Analyse the calculations of active ingredients and detect if errors occurred
- Enhancing the accuracy of the reported data

Benefits – Alleviate time-consuming workload

- Current manual processes to be eased

Benefits – Better analysis & reporting

- AMU System to integrate with a Business Intelligence tool for better analysis of collected data, valuable insights and visualization of important information

- Countries will be able to access, analyse and download their own data online and create various graphs
- Enhancing ownership of data

Benefits – Connection with OIE-WAHIS

Antimicrobial agents (mg)

=

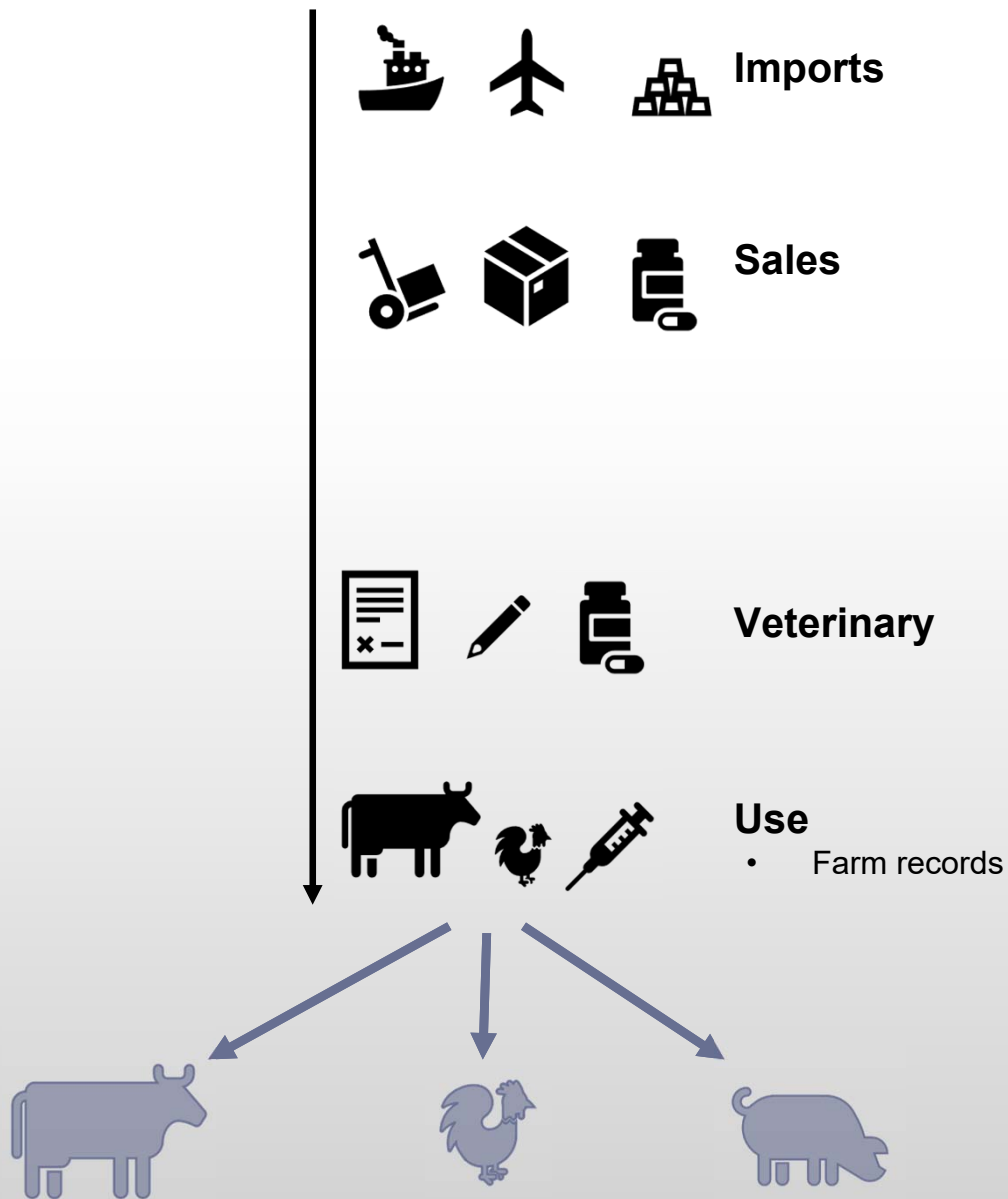

Animal biomass (kg)

Provide an analysis of the antimicrobial quantities (mg) adjusted by animal biomass (kg)

Future steps

Diapositive 18

- DG7** This are not really benefits for the countries, to give data at species level will make them to work more
Delfy Gochez; 12/09/2019
- DG8** For future steps for the countries, do we want that countries do something ?
Delfy Gochez; 12/09/2019
- MM8** Just to sensitize them that in future they will need to report data at species level
Mduduzi Welcome Magongo; 12/09/2019

Thank you for your attention
