

UNITED AGAINST RABIES

**Initiatives and progress so far in the implementation of
The Global Strategic Plan to end human deaths from
dog-mediated rabies by 2030**

Dr Rachel Tidman
Global Rabies Coordinator, OIE
on behalf of the Tripartite (FAO, OIE, WHO)

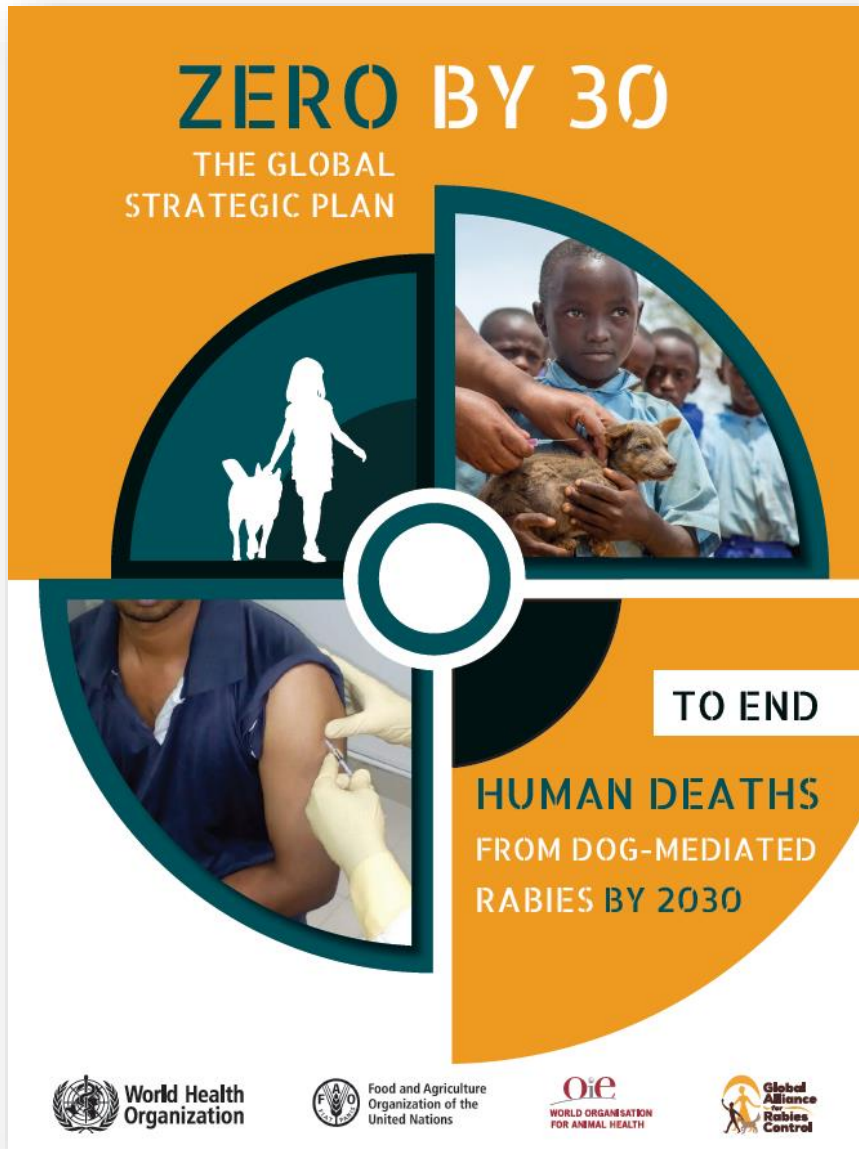

Food and Agriculture
Organization of the
United Nations

World Health
Organization

Change the status quo, and create a unified coalition for success

Leverage the unique position of the 4 partner organisations and put countries at the centre

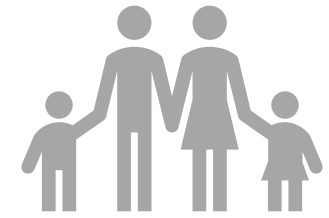

Establish global goals & objectives and an operational plan how we get there, outlines our value proposition

Aims at engaging with our stakeholders to define what success looks like

ZERO BY 30

The Global Strategic Plan to end human deaths from dog-mediated rabies by 2030

OBJECTIVE 1
to effectively use
vaccines, medicines,
tools, and
technologies

Reduce human
rabies risk

OBJECTIVE 2
to generate,
innovate and
measure impact

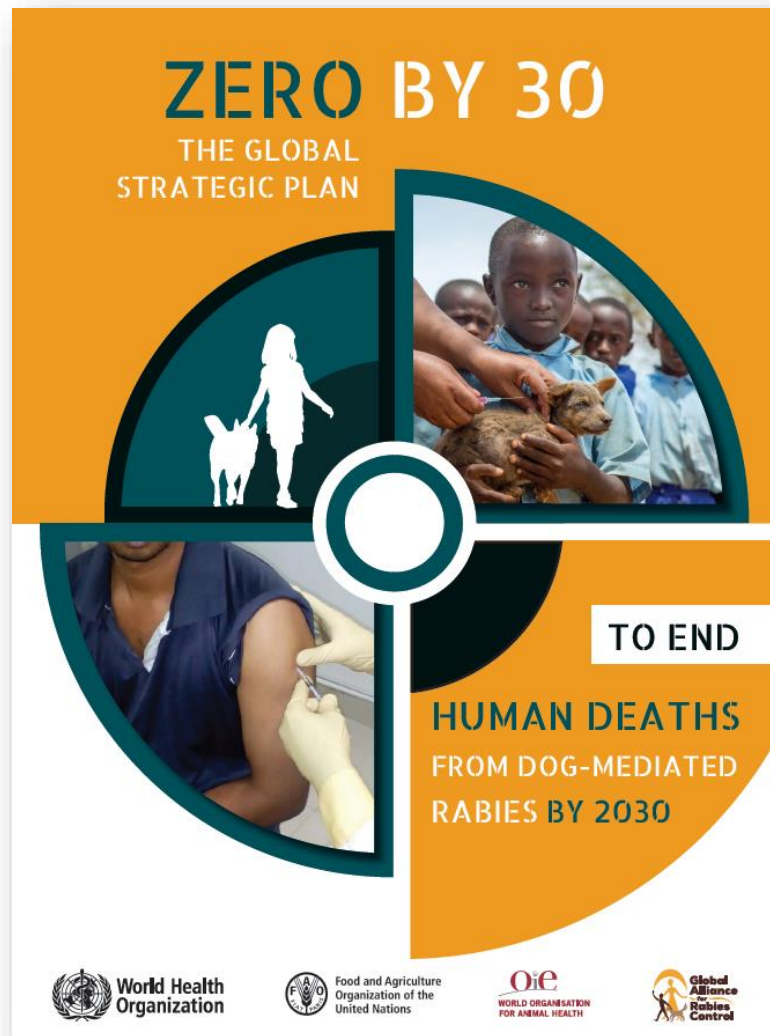

Provide guidance
and data

OBJECTIVE 3
to sustain
commitment
and resources

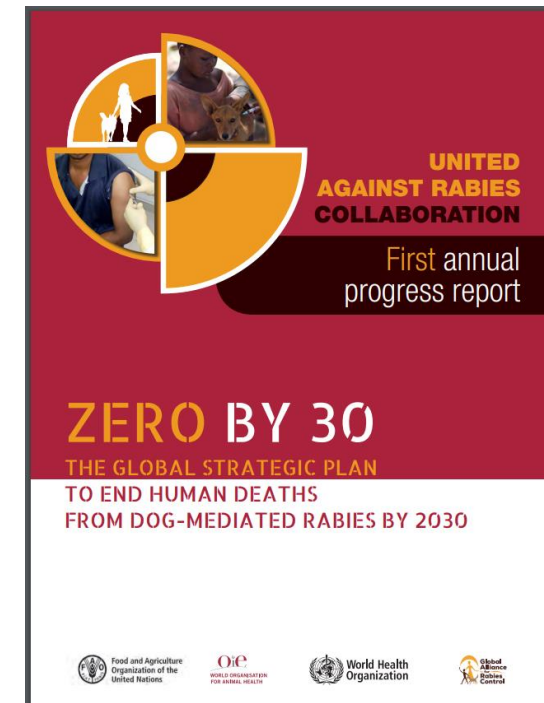

Harness multi-
stakeholder
engagement

First Annual Progress Report 'Zero by 30'

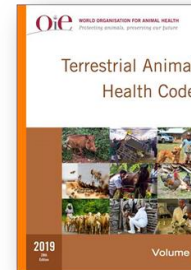

- Highlights progress made since the launch of 'Zero by 30' (06/2018)
- Reports on selected indicators per objective
- Concrete examples of successful implementation in countries
- Compiled by the 4 organizations (mainly Headquarters level)

Highlights of progress

Objective 1:

- Gavi's portfolio to include human rabies vaccine for eligible countries.
- increased access to dog rabies vaccines, 2 million doses of rabies vaccines (OIE vaccine bank) to 13 countries
- training on medical care for state of the art human rabies prevention in 79% of countries with human rabies cases
- enhanced rabies awareness in several countries and regions worldwide, beyond WRD.

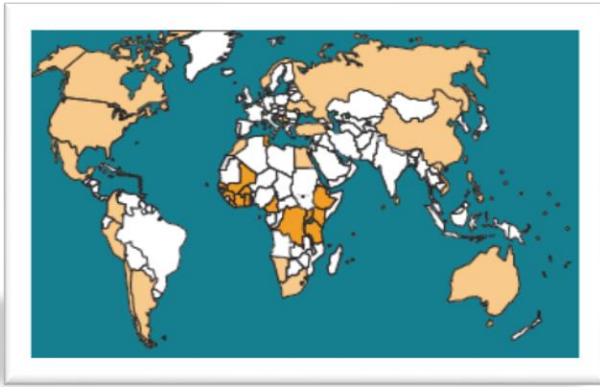

Objective 2.1:

- updated 6 global rabies standards to reflect best practice, with a One Health approach
- regional and national rabies-specific workshops in more than 60 countries reviewed progress of rabies elimination and country workplans
- development of an assessment matrix for operational tools used for rabies prevention (public domain)

Highlights continued...

Proficiency testing

Objective 2.2:

- ✓ capacity-building to improve laboratory diagnosis of rabies in >50 countries
- ✓ Improve data reporting & collection for better decision making and first steps for linking global databases

Objective 3:

- ✓ Creation of UAR Forum to galvanise sustained effort, political will, and additional resources
- ✓ increased commitment to “Zero by 30”, rabies listed as a top priority in the tripartite MoU of 2018
- ✓ 3 joint UAR press-releases and additional joint communications

MoH & MoA Tunisia committed to Zero by 2030

Next steps, 2020 and beyond: UAR Forum

- An **inclusive forum** of stakeholders from a range of sectors
- **Common vision** for rabies elimination
- **Establish** topic specific **Working Groups**
- Support the **implementation** of **'Zero by Thirty'**
