# KEY ACTION TERMS COMMON TO OIE/WHO REFERENCE MANDATES

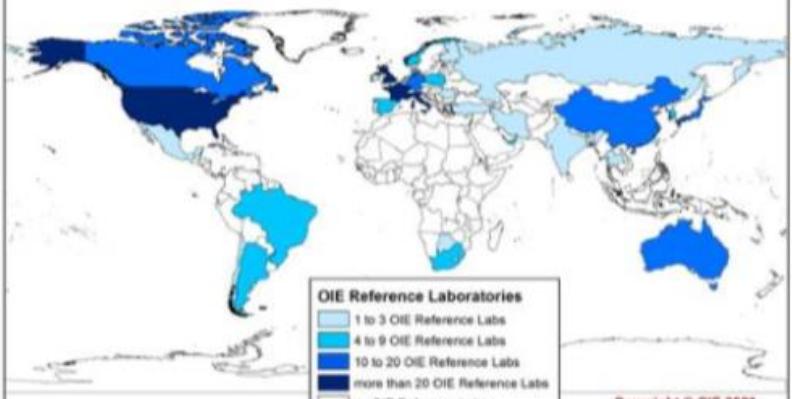

# OIE REFERENCE LABORATORIES FOR RABIES

WORLD ORGANISATION FOR ANIMAL HEALTH  
*Protecting animals, preserving our future*

World Distribution of OIE Reference Laboratories

267 OIE Reference laboratories  
for 118 diseases

OIE REFERENCE LABORATORIES FOR RABIES

12 OIE Reference laboratories for rabies

Collaboration between an OIE Collaborating Centre or an OIE Reference Laboratory and a Candidate Centre/Laboratory for

- Technical and scientific support
- Advice
- Training of the Candidate Laboratory
- Sharing experiences and ideas

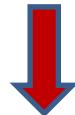

### Objectives :

- Improve global capacity for disease prevention, detection, and control,
- Improve scientific expertise,
- Strengthen national and regional laboratories capabilities,
- Create joint research opportunities, establishment of research networks and sustainable capacity building,
- For some of the Candidate Centre/Laboratories, to become OIE Reference Laboratories or Collaborating Centres for the benefit of their country and region.

- Long and friendly collaboration of Anses-Nancy with different institutions of Tunisia since the 1990s
- Relatively good knowledge of the rabies situation in the region (in Morocco in particular) and of the constraints and advantages in the region

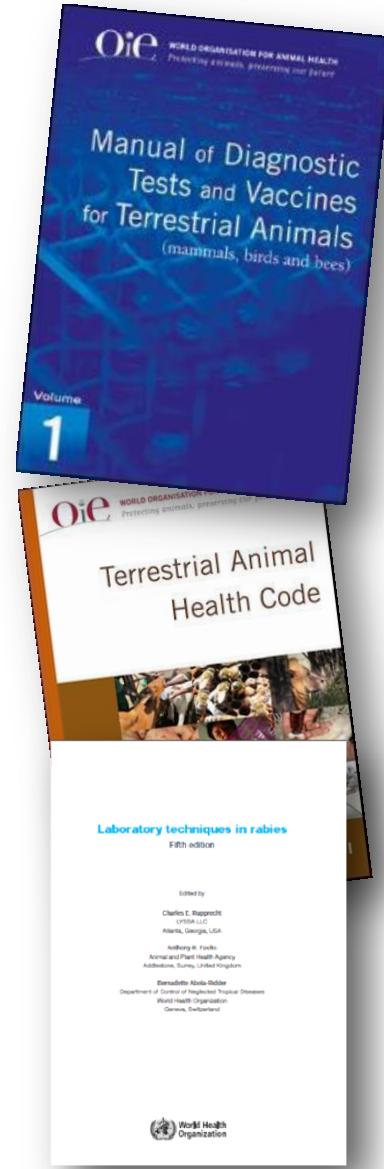

3 year Twinning project, co-financed by the OIE and by the Pasteur Institute Pasteur of Tunis

## WORK PROGRAMME

Activities	Objectives
Sustaining reliable rabies diagnosis	Improve molecular biology methods following OIE standards and international recommendations
Developing serological tools for assessing immunity of vaccinated pets and field dogs	<ul style="list-style-type: none"><li>- FAVN test and ELISA</li><li>- Participate to the proficiency tests organised by the rabies EURL</li></ul>
Strengthening and monitoring mass parenteral canine vaccination	<ul style="list-style-type: none"><li>- Collaborate with veterinary competent authority (DGSV):</li><li>- Implication of neighboring countries</li><li>- Improvement of dog accessibility to vaccination</li><li>- Studies on dog ecology</li></ul>
Acquiring ISO 17025 accreditation for rabies diagnosis and serological methods	Ensure reliable and confident results on rabies diagnosis and serology
Implementing tools for regional laboratory network	<ul style="list-style-type: none"><li>- Organise proficiency tests for rabies diagnosis</li><li>- Produce a naïve reference serum of dog origin</li></ul>

# WORK PROGRAMME

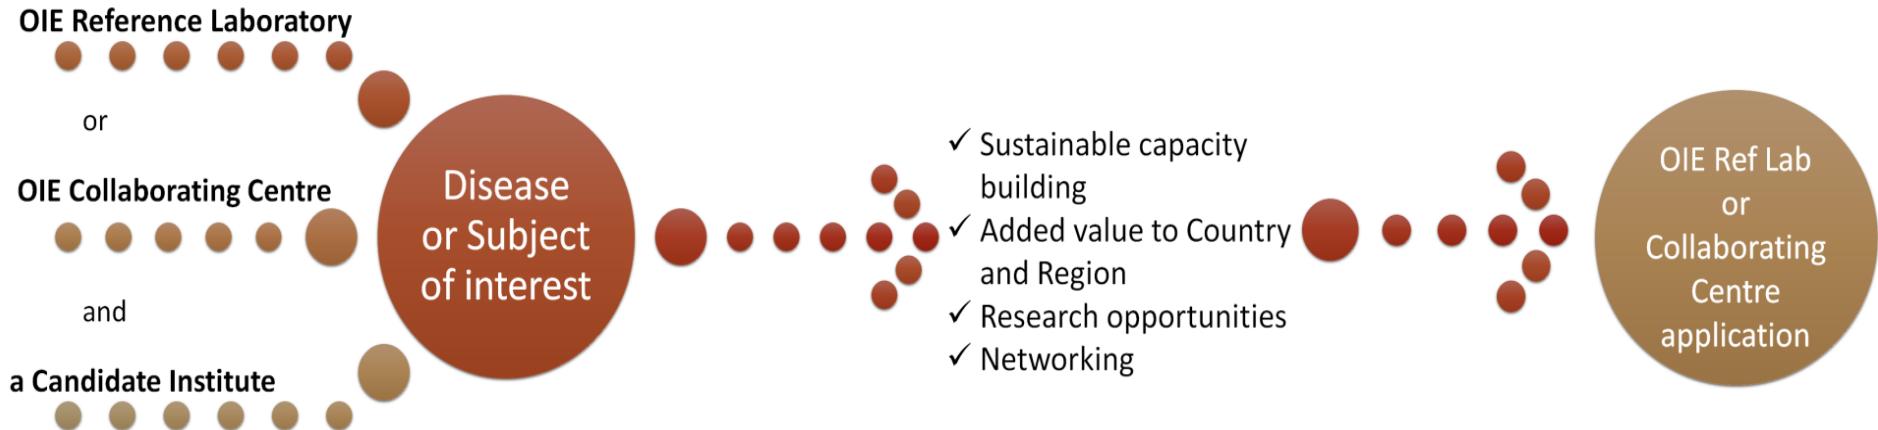

- Contribute to the tripartite One Health approach and to the objective « Zero human rabies cases by 2030 »
- Collaborate with the Istituto Zooprofilattico Sperimentale delle Venezie, FAO Reference Centre for Rabies (for proficiency tests, ERFAN project)
  - Organise proficiency tests for countries of the region
  - Improve the performance of the diagnostic detection tests
  - Provide advice and reagents for rabies diagnosis
- Share experiences with countries of the région (workshop)
  - Improve capacity labortory for rabies diagnostic
  - Improve epidemiosurveillance
  - Increase vaccination coverage of dogs
  - Undertake in certain areas studies on dog ecology

## FIRST MILESTONES ACHIEVED

Activities	Results
Sustaining reliable rabies diagnosis	<ul style="list-style-type: none"> <li>- List of reagents for the different SOPs on several techniques received </li> <li>- Training on molecular biology techniques planned initially in March 2021 at Anses and post-punned (travel restrictions) </li> </ul>
Developing serological tools for assessing immunity of vaccinated pets and field dogs	<ul style="list-style-type: none"> <li>- Success to the proficiency test organised in 2020 by the rabies EURL. IP Tunis should be soon on the EC list of authorized laboratories for rabies serology </li> </ul>
Strengthening and monitoring mass parenteral canine vaccination	<p>Discussions with veterinary competent authority (DGSV) started to select pilot areas for studies on dog ecology and vaccination follow up </p>
Acquiring ISO 17025 accreditation for rabies diagnosis and serological methods	Start of the process
Implementing tools for regional laboratory network	TO BE STARTED WITH YOU 

# CONCLUSION
