GF-TADs for AFRICA

The Regional Steering Committees (RSCs) act as regional stakeholder platforms, bringing together the OIE Regional Commission, FAO Regional Representation and WHO Regional Office(s) with the leading regional technical and where appropriate economical organisations, country representatives and regional and international development partners. The RSCs provide a platform for exchange of information to avoid overlap and to look for synergies by encouraging the creation of regional alliances and partnerships and the definition of a common vision and subsequent action plan for the control of priority TADs in the region. The RSCs are also promoted for supporting the governance and coordination or advising major regional or continental projects (for instance through back to back meetings as in the case of the Veterinary Governance project in Africa and the Highly Pathogenic and Emerging Diseases project in Asia).

The *Global Framework for the Progressive Control of Transboundary Animal Diseases* (GF-TADs) was launched on May 24, 2004, the signing date of the “FAO-OIE GF-TADs General Agreement”.

GF-TADs is a joint initiative of the *Food and Agriculture Organisation* of the United Nations (FAO) and the *World Organisation for Animal Health* (OIE) to achieve the prevention, detection and control of *transboundary animal diseases* (TADs) and in particular, to address their original and global dimensions. The initiative combines the strengths of both international organizations to achieve agreed common objectives.

GF-TADs is a facilitating mechanism which endeavours to empower regional alliances in the fight against TADs, to provide for capacity building and to assist in establishing programmes for the specific control of certain TADs based on regional priorities.

At the Global level, the GF-TADs **Global Steering Committee** (GSC) provides guidance on technical activities of global scope to be implemented by the GF-TADs Global Secretariat under the supervision and agreement of the GF-TADs Management Committee.

More information : <http://www.gf-tads.org/>

The GF-TADs GSC also provides strategic directions to the **Regional Steering Committees** (RSC) for the definition of their annual or multi-annual Action Plans and facilitates collaboration and cooperation between the global and regional levels.
