### Expression of interest for the Partnerships and Financing Panel of the GF-TADs

The Global Framework for the Progressive Control of Transboundary Animal Diseases (GF-TADs) is a joint initiative of FAO and OIE to achieve the prevention, detection and control of transboundary animal diseases (TADs) and in particular to address their original and global dimensions. The initiative combines the strengths of both international organizations to achieve agreed common objectives. The recently concluded 12th meeting of the GF-TADs supported the establishment of a Partnerships and Financing Panel (PFP) to provide guidance to the GF-TADs governing bodies to better support the efforts made by Regional Economic Communities and countries to control transboundary animal diseases (TADs) along the implementation phase of the GF-TADs Strategy for 2021-2025.

The terms of reference of the PFP can be consulted [HERE](#).

FAO and the OIE invite expressions of interest from **institutions and individuals** to be part of the PFP, to be established during the first quarter of 2022. The initial core group, not exceeding 20 members, shall consist of selected participants representing global

## GF-TADS FOR ASF

▶ THE GLOBAL INITIATIVE FOR THE CONTROL OF ASF

### African swine fever at a glance

*African swine fever* (ASF) is a contagious disease of domestic and wild pigs. The number of countries and territories affected by ASF has increased in recent years, with notifications from countries across sub-Saharan Africa, Europe and Asia. The ASF situation continues to evolve (access to the latest updates), threatening pig health and welfare worldwide.

Materials at regional or subregional level  
Developed in different context/partners  
Contributions by organisations, academia, countries

**Report on the status of African swine fever (ASF) laboratory diagnostic capacities in South-East Asia, China, Papua New Guinea and Timor Leste**

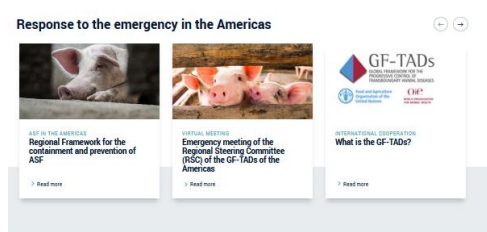

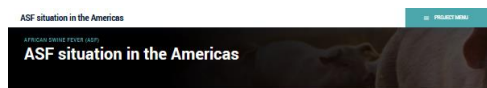

# GF-TADS sections on Regional OIE websites Americas

<https://rr-americas.oie.int/en/projects/african-swine-fever-asf/>

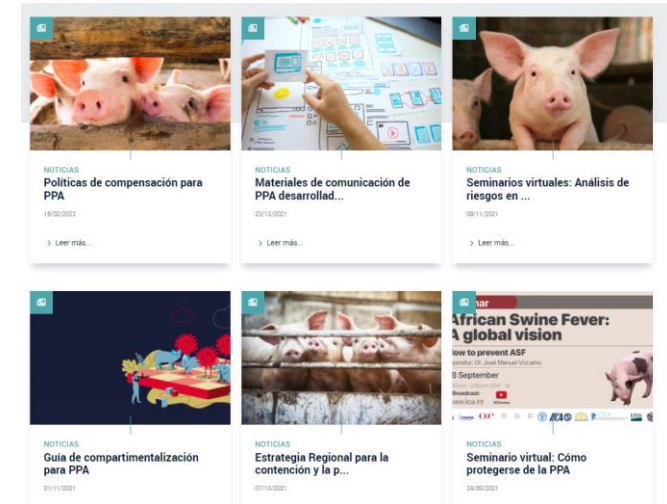

Many contributions and videos accessible online  
(SP +/- EN/FR translation)

Contributions from FAO, OIE, regional organisations and countries

## Communication campaigns

## Conclusions

Openness to publish contributions from partners

Transparency promoted

A lot of material available

Each region has its way to present/organise

Difficult to find / identify what is available

Static content only

No alert on new material

Elaboration of documents via exchange of emails  
(attachment or online version)

### ***Need for a collaborative tool***

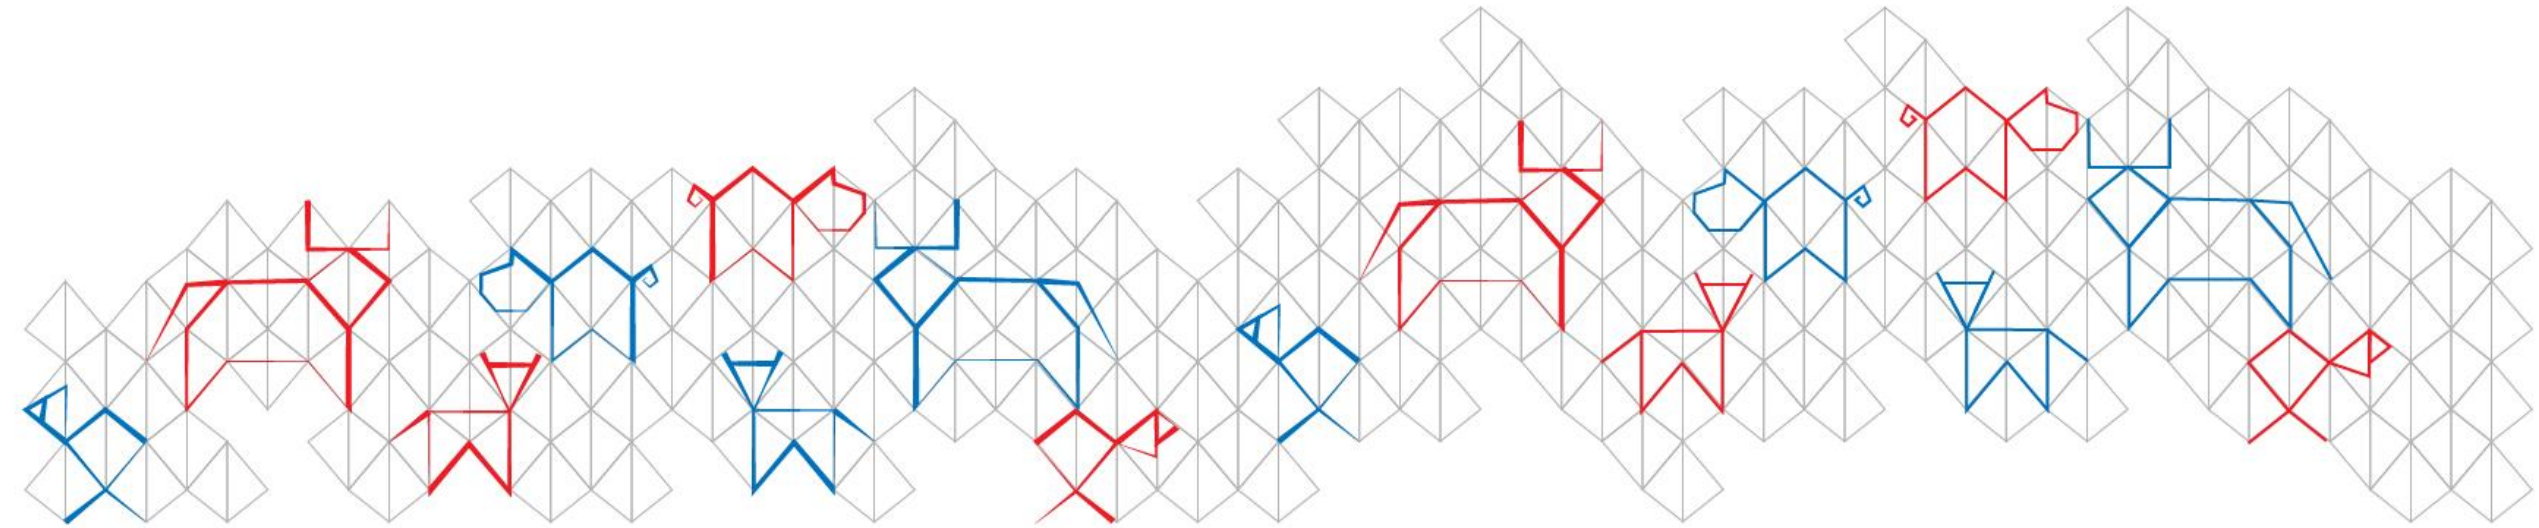

*Connect the regions and material available*

*Secured space to chose groups of users to share documents with*

*Possibility to edit documents*

*Alert and networking*

*Maintain transparency and visibility: will not replace websites*

Thank you for your attention,  
questions and comments
