Day 2
7 December 2022

World Organisation for Animal Health
Organisation mondiale de la santé animale
Organización Mundial de Sanidad Animal

6th cycle Training of National Wildlife Focal Points
6e cycle de formation des Points focaux nationaux pour la faune sa
Africa Region Afrique
World Organisation for Animal Health
Organisation mondiale de la santé animale

USGS

Application of concepts

Based on the presentations yesterday and your own experience with diseases in your region, what do you think the key control strategies are for managing wildlife health?

USGS

Application of concepts

Consider a wildlife disease you are familiar with for your region that _could_ be controlled by **density reduction or culling** of wildlife.

What do you think the biggest social or ecological challenge would be for using this method to control the disease?

Application of concepts

Consider a wildlife disease you are familiar with for your region that *could* be controlled by **density reduction or culling** of wildlife.

What do you think the biggest social or ecological challenge would be for using this method to control the disease?

USGS

Application of concepts

Consider a wildlife disease you are familiar with for your region that *could* be controlled with **fencing**?

What do you think the biggest social or ecological challenge would be for using this method to control the disease?

Application of concepts

Consider a wildlife disease you are familiar with for your region that _could_ be controlled by **environmental remediation**.

What do you think the biggest social or ecological challenge would be for using this method to control the disease?
