The image shows the front cover of a report titled "Report of Gap Analysis Meeting for CBPP". The cover is blue at the top and white at the bottom. It features the FAO and WOAH logos at the top right. Below the logos, the title "Report of Gap Analysis Meeting for CBPP" is written in white. Underneath the title, it says "26-28th June 2023" and "Sanger Institute, Hinxton, UK". It also mentions "Organised by USDA-ARS and STAR-IDAZ IRC" and "Workshop Report". At the bottom left, there is a small European Union flag and the text "Funded by the European Union". The bottom half of the cover has four small images: a close-up of blood cells, a cow grazing, a cross-section of meat, and another close-up of meat.

The image shows the GF-TADs logo, which consists of a blue and orange triangle. To the right of the triangle, the acronym "GF-TADs" is written in large letters. Below "GF-TADs", the full name "GLOBAL FRAMEWORK FOR THE PROGRESSIVE CONTROL OF TRANSBoundary ANIMAL DISEASES" is written in smaller letters.

The screenshot shows the homepage of the GF-TADs for Africa website. At the top right, there is a navigation bar with the WOAH logo, a search icon, the text "GF-TADS FOR AFRICA", and a "PROJECT MENU" button. Below the header, the WOAH logo and name are displayed. The main title "GLOBAL FRAMEWORK FOR THE PROGRESSIVE CONTROL OF TRANSBoundary ANIMAL DISEASES" is followed by the bold text "GF-TADs for Africa". To the right, there is a photograph of a group of people gathered around cattle. At the bottom, there is a section titled "Implementing partners at international level" featuring logos for FAO and WOAH.

Péri-pneumonie contagieuse bovine - Groupe permanent d'experts (GPE)

INTRODUCTION

Le *Groupe permanent d'experts (GPE)* sur la *péripneumonie contagieuse bovine (PPCB)* pour l'Afrique a été créé en juin 2023 à l'issue d'une consultation de six jours avec tous les Membres, sur la base des [termes de référence](#) approuvés par le 11e Comité de pilotage régional (CPR-11) du GF-TADs pour l'Afrique, tenu en juin 2022.

Ces pages visent à collecter et à mettre à disposition toutes les informations utiles sur le fonctionnement du GPE et s'appuient sur les contributions des Membres.

Merci de soumettre vos contributions (documents, photos, questions, etc.) à p.bastiaensen@woah.org avec la mention CBPP SGE dans l'objet pour publication sur ces pages.

FAO coordinates strategies to respond to Contagious Bovine Pleuropneumonia in Africa

13 December 2013 – In the early 1970s, Contagious Bovine Pleuropneumonia (CBPP) appeared to be under control in Africa. However, after almost 20 years of respite, there has been an alarming resurgence of the disease on the continent. Today CBPP is regarded as the most serious infectious animal disease affecting cattle in Africa and a major constraint to production.

The effect of the disease on beef, milk and crop production through the use of plough oxen is devastating, with particular implications for food security within countries affected by CBPP. The disease has contributed to great economic losses and therefore to increased poverty levels in many parts of Africa.

The Food and Agriculture Organization of the United Nations (FAO) Regional Office for Africa (RAF), in close coordination with FAO's Animal Health Service (AGAH) and with the support of the regional office of the United States Department of Agriculture (USDA), organized a regional consultation to develop a "Regionally Coordinated Strategy for the Prevention and Control of Contagious Bovine Pleuropneumonia in Africa". The Ministry of Livestock and Animal Production of Senegal hosted the consultation at FAO headquarters in Rome from 19 to 21 November 2013. It was organized under the umbrella of the Global Forum for the Control of Transboundary Animal Diseases (GF-TADs) in Africa and constituted a follow-up of previous consultations, with the last one being held in November 2006 in Rome headquarters.

Directors and representatives of Veterinary Services from 12 countries attended the meeting in addition to representatives from the World Organisation for Animal Health (OIE) and FAO headquarters and FAO country offices from across Africa. Other representatives were from CIRAD, the Central Veterinary Laboratory Mali (CVL/Mali), the Ecole Inter Etats de Sciences et Médecine Vétérinaires (EISMV), GALVmed, the Institut sénégalais des recherches agricoles (ISRA), the Inter African Bureau for Animal Resources of the African Union (AU/IBAR), the Pan-African Veterinary Vaccine Centre of the African Union (AU-PANVAC), the USDA regional office and livestock professional organizations.
