eboSURSY

ALERT: A COLLABORATIVE BOARD GAME TO ENGAGE IN «ONE HEALTH» SURVEILLANCE

World Organisation
for Animal Health
Founded as OIE

- Emerging zoonoses in communities at the human-wildlife interface
Ex. Ebola in central and west Africa
- Limits to conventional means in ensuring the commitment of stakeholders in the surveillance of zoonotic diseases
- Low level of knowledge and involvement in surveillance

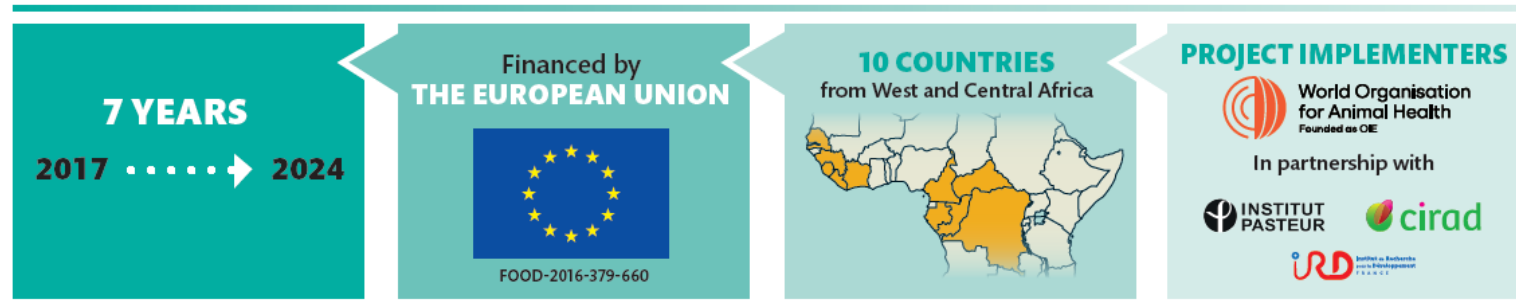

Need for innovative tools to train and actively engage actors

CAPACITY BUILDING AND SURVEILLANCE FOR EBOLA VIRUS DISEASE

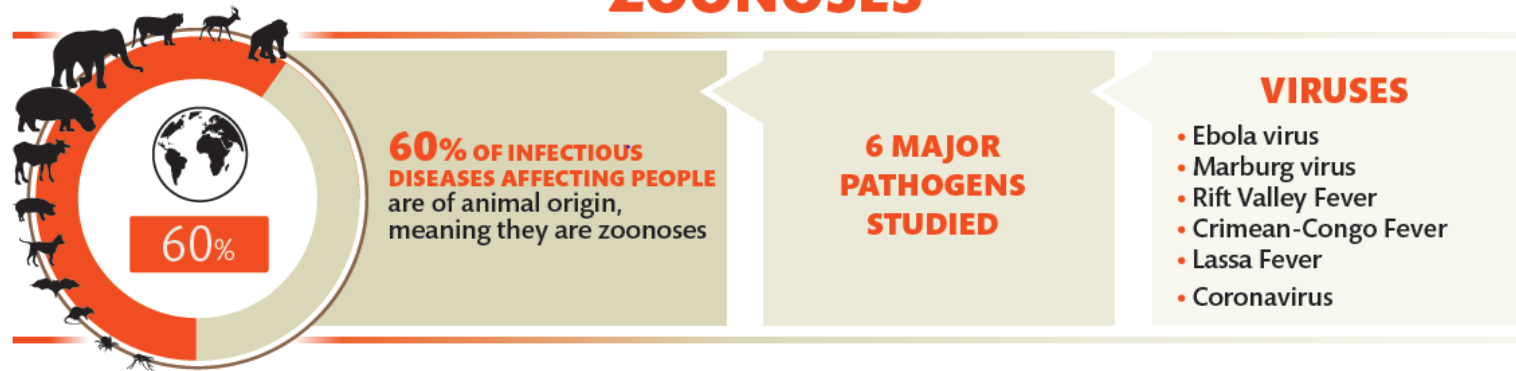

Improving early warning systems and preventing viral haemorrhagic fevers

PROJECT

ZOO NOSES

OBJECTIVES OF THE GAME

3

- Raising awareness among local communities of their roles and responsibilities in the surveillance chain;
- Strengthening collaboration between communities and the technical services in charge of the surveillance system;
- Strengthening the commitment of stakeholders to the system, thereby guaranteeing its sustainability and effectiveness

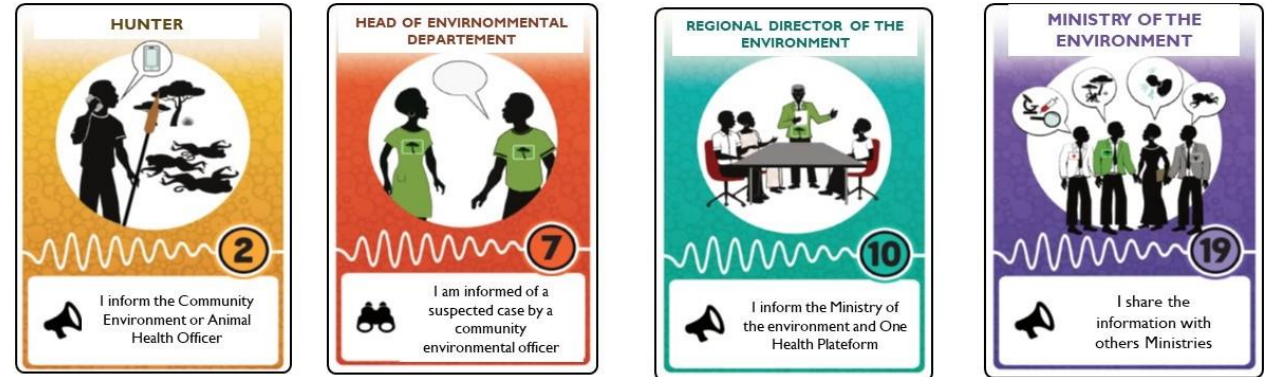

- Learn about One Health surveillance systems for viral hemorrhagic fevers
- Build a surveillance system from the local to the central level
- Play a collaborative game to better understand the role and responsibilities of the surveillance system' stakeholders
- Understand the value of collaboration between the different actors in the chain of surveillance
