Aquatic Code and Terrestrial Code

Standards for the improvement of animal health and welfare, and veterinary public health worldwide, including the prevention of disease spread through international trade of animals and animal products.

Aquatic Manual and Terrestrial Manual

Standards for diagnostic tests and vaccines (*Terr. Manual* only).

WOAH Standards

Recognised by the World Trade Organization SPS Agreement (the Application of Sanitary and Phytosanitary Measures Agreement) as the International Standard Setting Organisation for animal health and zoonoses.

Used by Veterinary or Competent Authorities

Overview of WOAAH's 7th Strategic Plan

Focus on digital transformation and innovation
Strengthening global health security
Embracing technology to support Members

Alignment with Standards Navigation Tool

Supports strategic goals by making standards more accessible and manageable

The Digital Transformation

Rise of cloud-based services and universal access to data
Digital platforms enabling global access in real time
Easier access to critical information across the globe

Outputs

1. Public WOAAH Website:

- Recommendations for Safe International Trade by Commodity: A tool allowing users to visualize trade recommendations with a filtering system (currently for the Terrestrial Code, with potential expansion to the Aquatic Code).
- Navigation and Search Tool: An intuitive interface for navigating WOAAH's terrestrial and aquatic codes and manuals.

2. Internal WOAAH Use:

- Internal Interface: A dedicated platform to efficiently manage and update WOAAH International Standards, following adoption of new or revised text at the WOAAH General Assembly.

Fundamental Features

Unified access to WOAAH standards

Intuitive search and filter system for easy navigation

Recommendations for safe international trade by commodity

Centralized management interface for WOAAH staff

Efficiency in managing updates

Greater collaboration among WOAAH departments

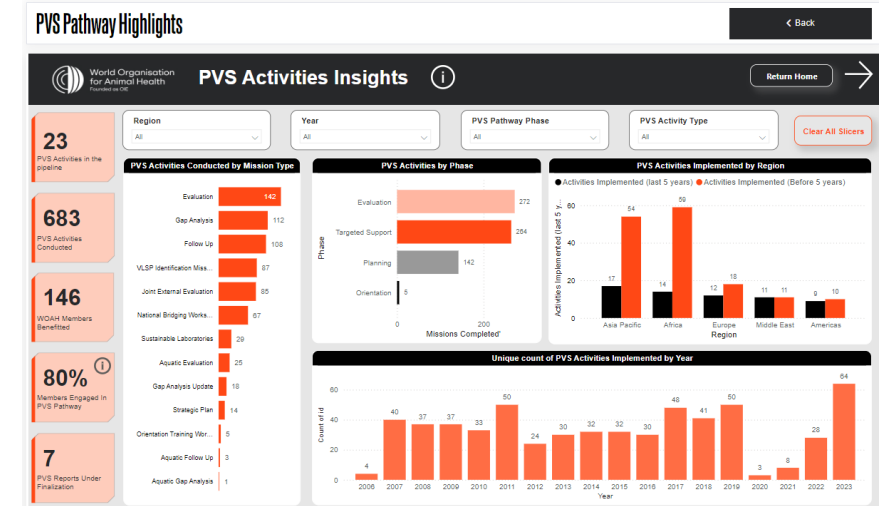

Linking to Other Digital Tools

- Potential for future integration with other WOAHA tools to enhance data usage
- Cross-referencing standards data with other organisational platforms

Analyzing Previously Inaccessible Data

- The digital format opens new opportunities for data analysis and insights
- Long-inaccessible data will now be leveraged to enhance understanding and standardise data elements within the Standards

A A

Objective

Obtain WOAHA recommendations to ensure the safe import of bovine meat

Methodology: Import risk analysis

1. Internal discussion to consider the relevant diseases and the specific measures provided in the *Terrestrial Code*
2. Use of the “Recommendations for safe international trade by commodity”
3. Consider animal health status at origin
4. Export the report to discuss with the technical teams

Result

Issue WOAH recommendations from the *Terrestrial Code* needed to ensure the safe import of bovine meat

Key features for WOAAH Staff

Standards Update

- Consistent across all Standards
- Simpler, saving time and effort
- facilitated edits to texts, including major changes like adding new chapters.
- Improved efficiency
- Better translation management
- Multi-reviewer process ensures content accuracy

Use

- Boost Secretariat efficiency in managing the update process
- More consistency and harmonisation within and across standards
- Enables efficient and collaborative review, streamlining interaction with the Standards

Added value

- Cost-effective solution
- Database integration in WOAAH DMS
- Enables connection of Standards' data with other tools
- Accessible Standards through user-friendly platforms

Thank you
