# INTRODUCTION

- ❖ The Tunisian economy relies on agriculture, which plays an important socioeconomic role.
- ❖ The agricultural sector contributes 8% to GDP, 9% to export value, and 16% to job creation.
- ❖ Livestock farming accounts for 35-40% of agricultural GDP, or 4-5% of total GDP.
- ❖ Cattle in 2024: 450000

# Animal health

# Kinds of surveillance

## Surveillance for disease/infection-free status

Demonstration of disease-free status

Early warning system in place

## Surveillance to support disease control programs

Prevalence or incidence

Morbidity and mortality

risk factors and their quantification

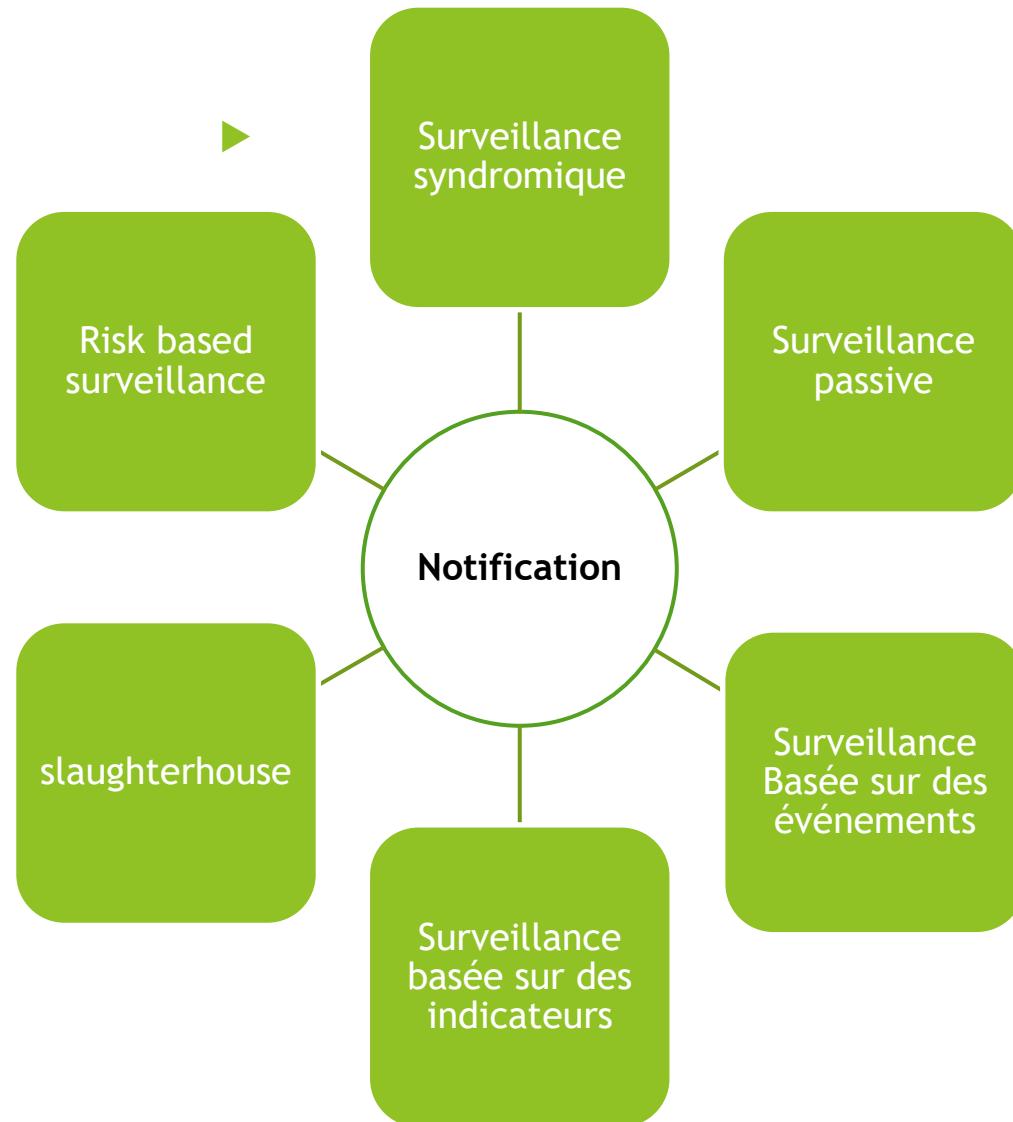

distribution of laboratory test results

post-vaccination monitoring;

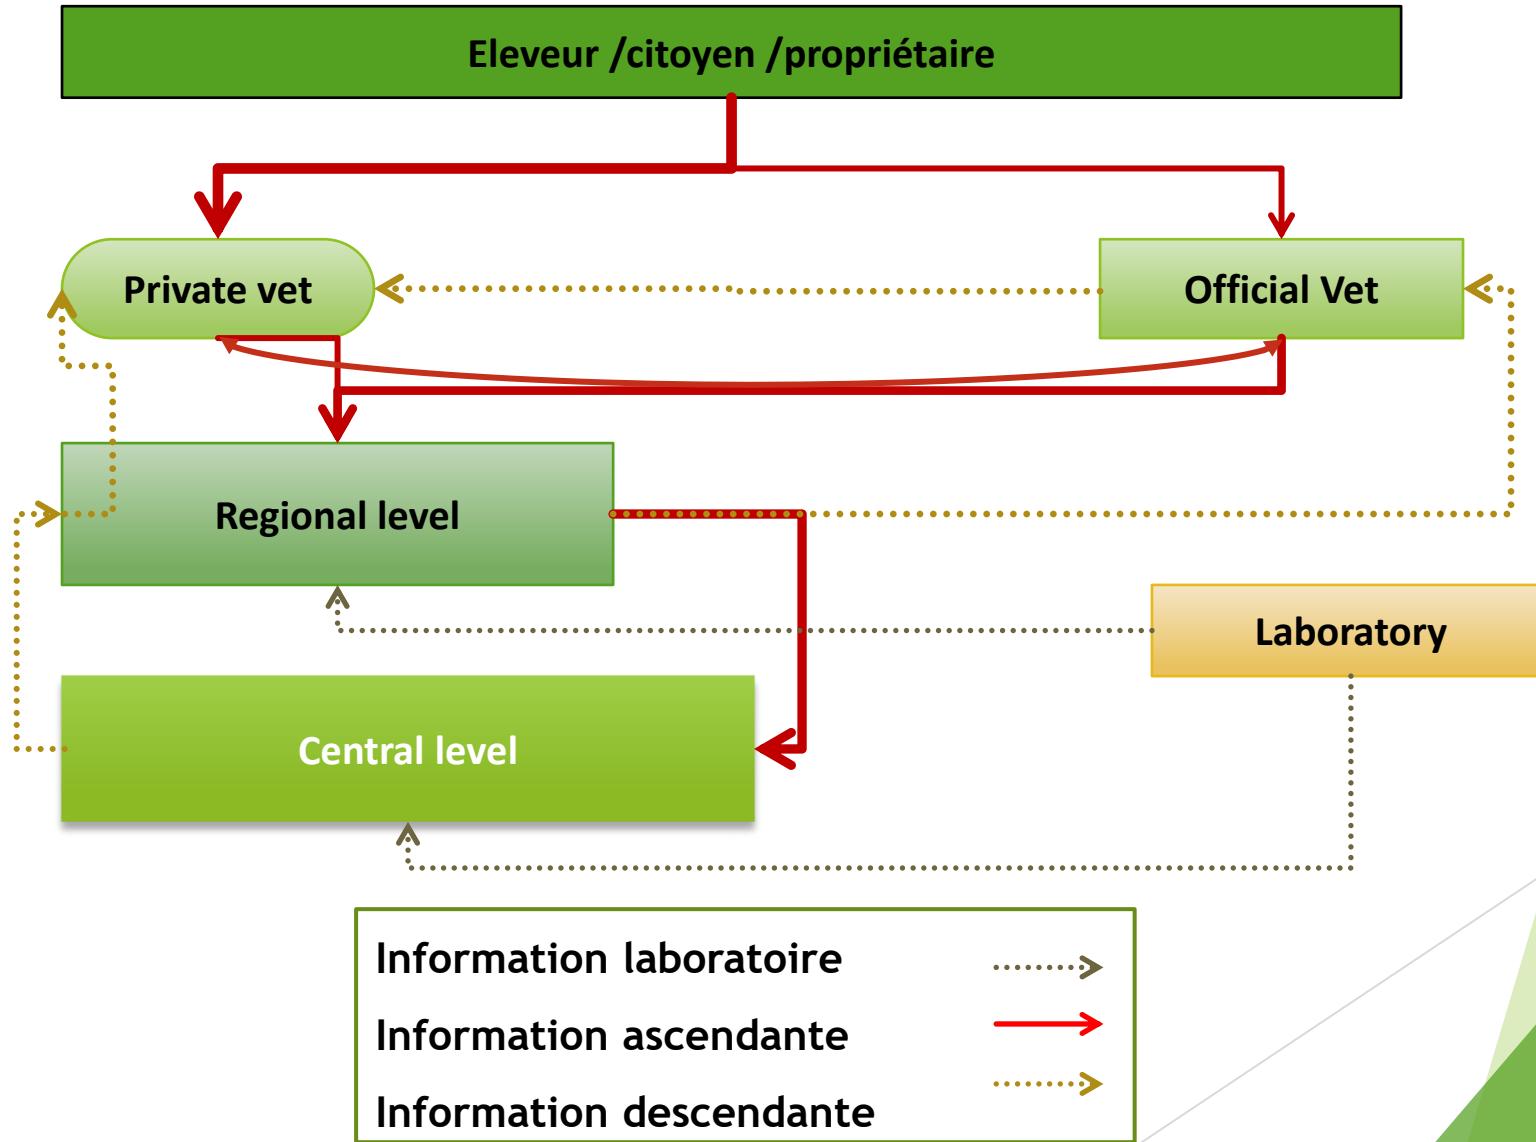

distribution of infection in wildlife

# Animal health data for notification

# Notification

# Management of data base from notification

- Never suspected
- Passive surveillance actually is the most important compound of surveillance

# Endorsements of control programmes and official statutes

## FMD

Working towards  
Endorsement of official control plan  
Free status with vaccination

## PPR

Working towards  
Endorsement of official control plan  
Free status without vaccination

## AHS

Free status  
WOAH official freedom

Target diseases:

Prion Diseases

CBPP

# conclusion

- Tunisia is involved in the region's efforts to obtain health status.
- Follow the chapter 3.4.8. of TC and chapter 3.4.8.of TM

passive monitoring

syndromic approach

implication of stakeholder

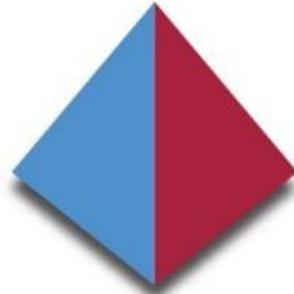

slaughterhouse

laboratory

screening investigation

awareness and communication sessions
