

COUNTRY ASPIRATIONS & GAPS

MENTIMETER SESSION

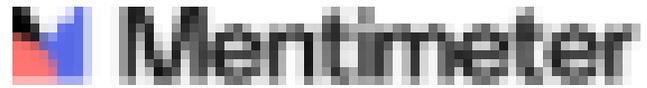

Name: Viola Chemis

Designation / Organisation: WOAH

**Workshop on FMD Epidemiology, Surveillance, and
Diagnostics to Strengthen Control Efforts in Eastern Africa**

21st - 23rd October 2025, Mombasa, Kenya

Join at menti.com | use code **83719344**

TEST

No questions from the audience!

Incoming questions will show up here so that you can answer them one by one.

1. What is your expectation from the training?

A better understanding of FMD control efforts in the region and challenges that require concerted effort

Learning from each other in way of strengthening FMD surveillance and diagnostic

To have lessons different from those in our country. To understand FMD more.

Understanding the distribution, risk factors of fmd spread, how to do effective and sustainable surveillance using all forms

Experience and information sharing

Understand the regional plans in place and plans to scale up fight against FMD. How all of us can work together to achieve the same. In addition, how to maneuver politics in FMD control in Africa

Innovative methods of diagnosis and surveillance plus control...Doing thing differently

What are regional FMD vaccine producing labs doing to support the disease control?

Indepth knowledge on FMD control in Eastern Africa

Better understand PCP and country experiences

1. What is your expectation from the training cont...

Yes

Understanding PCP for TADS

improved knowledge and skills on Control of FMD

To connect and get working solutions for FMD control

To have knowledege that enables my country to improve FMD control and staging in the PCP-FMD

Learn from the Gurus on FMD control, the past, the present and the future of disease control industry

Country PCP status and working control strategies for FMD

Knowledge sharing, getting familiar with PCP-stages from different countries

2. What is the country's aspiration on FMD

Regional control coordination

Reduce FMD outbreaks within 3 years- Kenya

Staging to level 3 of the PCP-FMD to enhance cross border trade

Without extension services to persuade farmers on the importance of vaccines , would you think mandatory vaccination will give sustainable solution in control of FMD?

FMD free status

To eradicate FMD so as to open luxuries market for animals and animal products

KE: Progress to the next stage and Eradicate with vaccination

UK: Remain FMD free and ready to deal with FMD

Regional control coordination

To have FMD controlled on South Sudan

To reduce FMD outbreak incidences, KE

Reduce FMD Outbreaks within 3 years

IGAD-ICPALD

ETH, Want to progress from stage 1 to 2 and progressive control

Control active outbreak in 3 years. Then maintain disease free status thereafter.

Regional-Diseases Prevention and Control

To have FMD controlled on South Sudan

Budget allocation

Vaccines quality and availability

Vaccines availability and cost

Diagnostics, funding, technical VS capacities and vaccine availability and affordability

Better control of animal movements and better more affordable vaccines

Rw:cross border movement of animal that is uncontrolled

Capacity, budget, surveillance problem in some regions, livestock movements

Inadequate surveillance, lack of funding for control activities, disjointed control activities between different administrative areas.

Lack of political commitments

Funding, Illegal animal movements and uncoordinated vaccination programmes

Existing gaps and challenges preventing progression in FMD control cont...

properly coordinated vaccination programs, surveillance and timely response to outbreaks, virus characterization

Illegal animal movements Weak surveillance
Uncoordinated vaccination program

Weak FMD monitoring and reporting, low vaccination, uncontrollable animal movements, poor financing

Vaccine Matching

Funding, Illegal animal movements and uncoordinated vaccination programmes

Knowing the strains circulating in a particular region is one of the limiting factor of vaccine effectiveness

Inefficient Vaccine quality and supply

Vaccine availability and affordability Funding and technical capacities Strong surveillance system in the country and cross border coordination with an integrated vaccination programmes

1. Resources or funding to facilitates FMD activities 2. Access to vaccines to implement vaccination 4. Capacity of Central Veterinary diagnostic is limited 5. South sudan FMD strategy need to be

Country Reflections on FMD Control

	GAPS	ACTION
EPIDEMIOLOGY & SURVEILLANCE	<p>KENTA UNDER-REPORTING</p> <p>Costs - Insufficient funding - No budget allocated</p> <p>TZ Sufficient funding needed</p> <p>ETH Ethical considerations - Insufficient funding - No budget allocated</p>	<p>KENTA CREATING AWARENESS TO REPORT DISEASE AMONG THE VULNERABLE COMMUNITY</p> <p>KENTA CAPACITY BUILDING OF VETERINARY PRACTITIONERS</p> <p>TZ In sufficient active surveillance</p> <p>ETH Action - Insufficient funding - No budget allocated</p>
