RABIES ALLIANCE

Ending Rabies. Empowering Communities.

GARC's mission

Established in 2007, GARC is committed to **eliminating human and animal deaths** from dog-mediated rabies by **building** and **strengthening** the capacity of local, national and global stakeholders.

From individual champions and community groups to national governments, we **empower people** to lead and sustain effective rabies elimination efforts.

GARC's mission

We drive long-term impact by

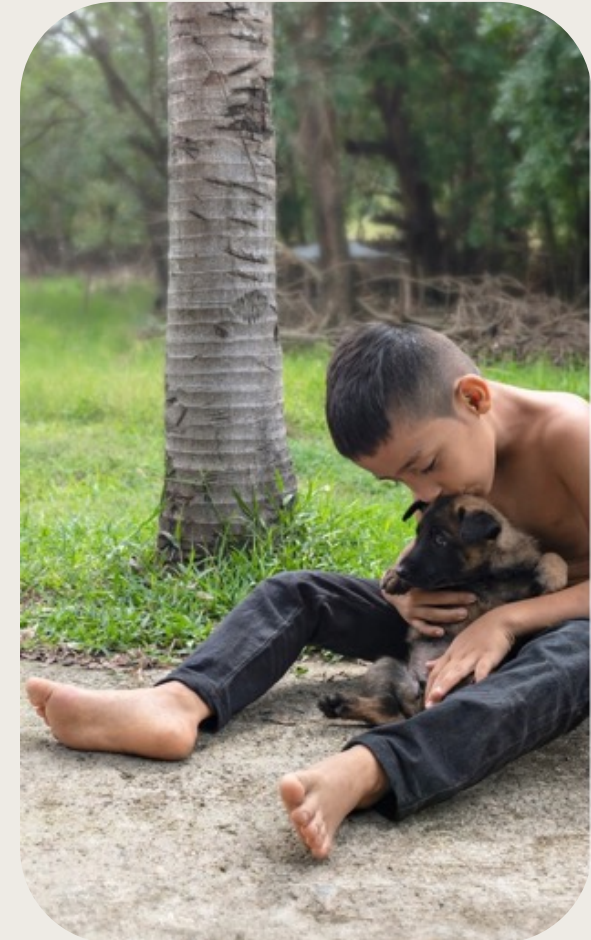

Supporting stakeholders with **specialized digital tools**, like the GARC Data Platform that helps users capture and visualize real-time rabies data.

Offering **comprehensive training opportunities** using the GARC Education Platform courses to enhance stakeholders' skills and knowledge.

Providing expert guidance, tools and continuous support throughout the rabies elimination process.

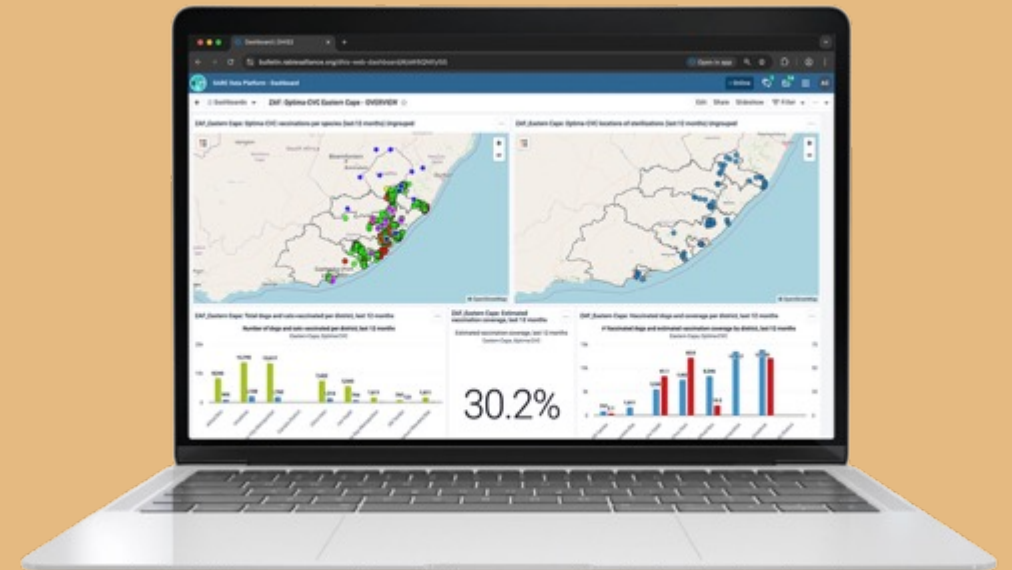

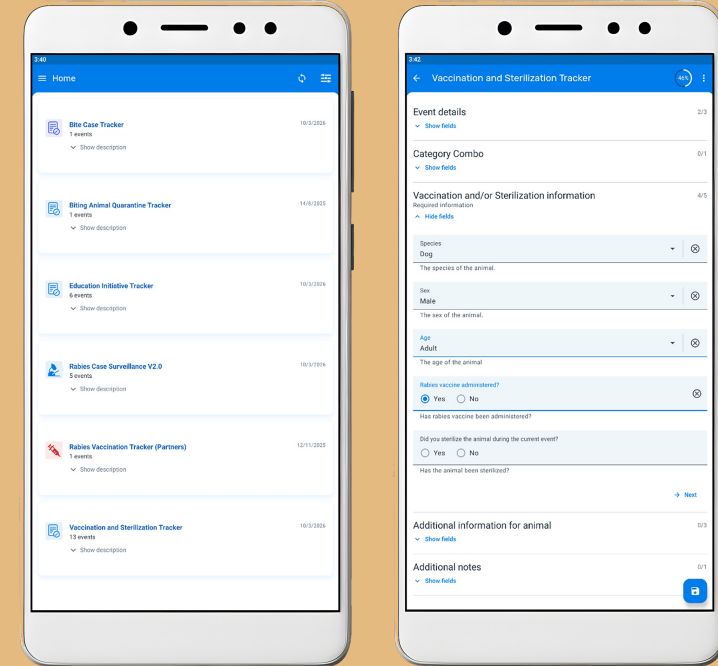

The GARC Data Platform

The GARC Data Platform

The GARC Data Platform is a comprehensive Platform that assists users in collecting, analyzing, and visualizing rabies-related data across every aspect of the disease.

The GARC Data Platform

Vaccination tools

RABIES VACCINATION TRACKER

VACCINATION AND STERILIZATION TRACKER

CATCH NEUTER VACCINATE RETURN TRACKER

Surveillance tools

RABIES CASE SURVEILLANCE

BITING ANIMAL QUARANTINE

BITES CASE TRACKER

Supporting tools

EDUCATION INITIATIVE TRACKER

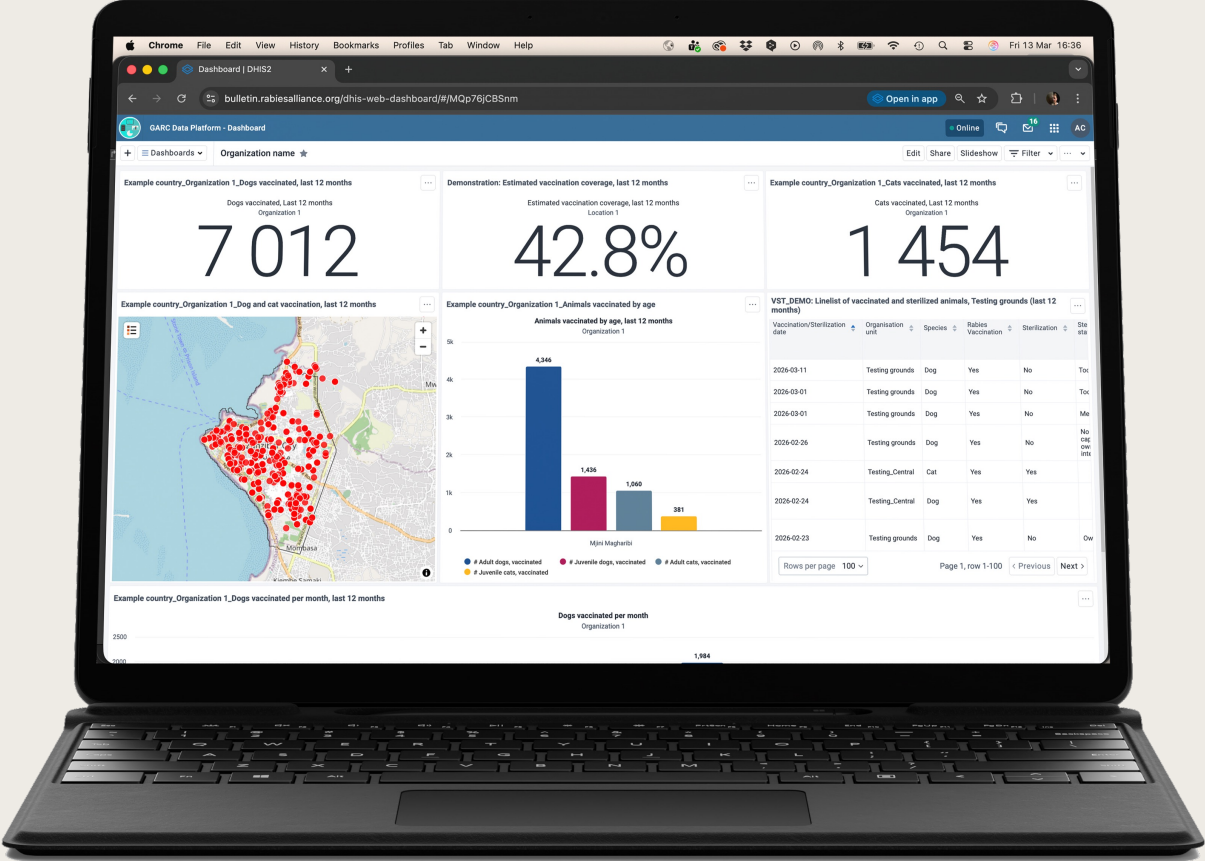

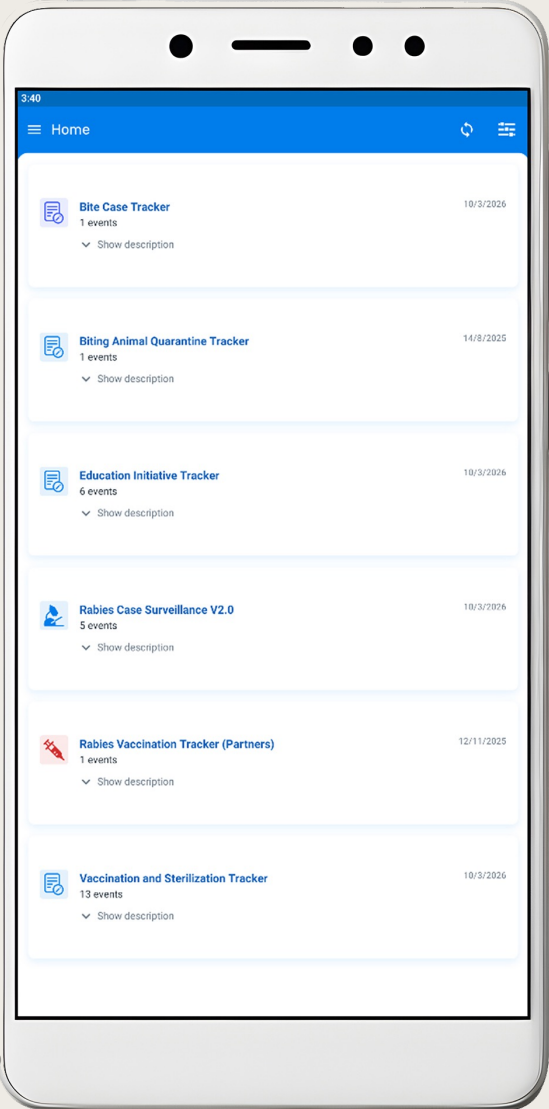

RABIES TREATMENT TRACKER

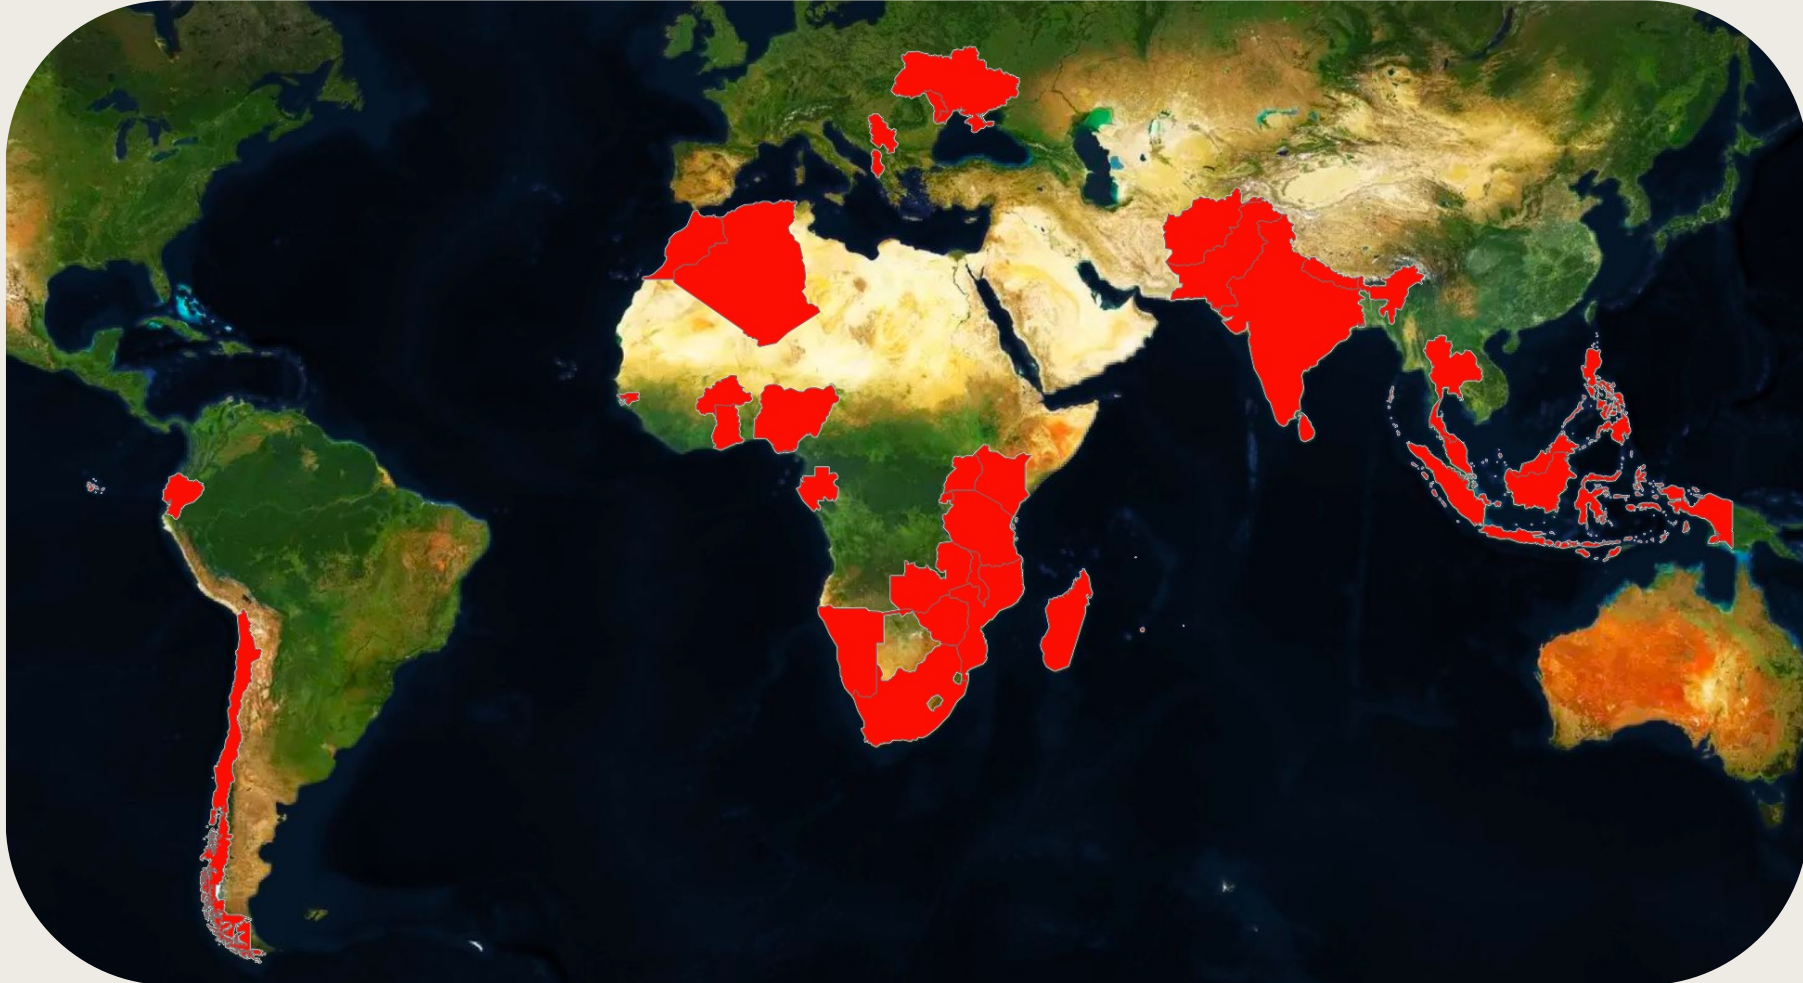

VACCINATION COVERAGE ESTIMATOR

The GARC Data Platform

Technical support

Implementing lateral flow kits

Rapid In-field Diagnosis and Epidemiology of Rabies (RAIDER) toolkit

- A Standard Operating Procedure that **enables lateral flow devices to be used for diagnostic screening** along with the GARC Data Platform.
- Aligned with the recommendations made in the WOAAH guidelines.

Implementing lateral flow kits

As the GARC App is used to immediately capture and report the diagnostic screening result, strategic vaccination campaigns are implemented without any delay.

Red dots = Positive samples.

Red shaded circle = 1km catchment area around positive samples.

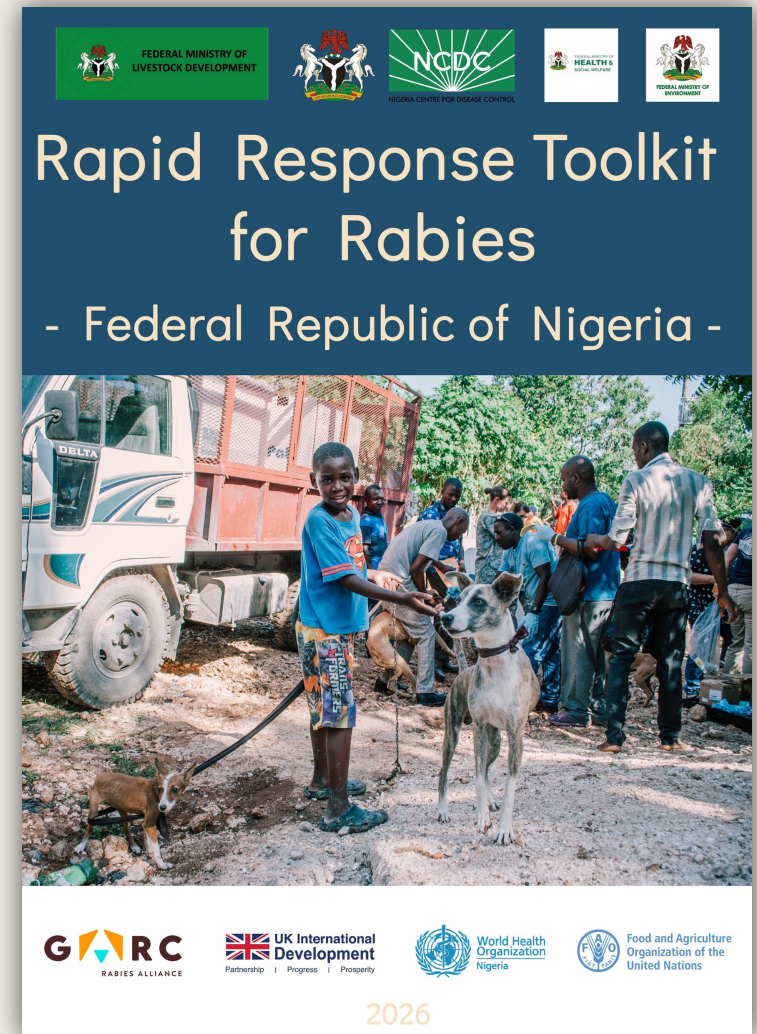

Black dots = Vaccinated dogs.

Example of real data collected during a targeted dog vaccination campaign initiated through the RAIDER toolkit.

Implementing IBCM

Rapid Response Toolkit for Rabies

- Interactive toolkit used to implement and operationalize **Integrated Bite Case Management**.
- Combines:
 - GARC Data Platform
 - Standard Operating Procedures and protocols that can be customized.

Assessing rabies elimination programs

Stepwise Approach towards Rabies Elimination workshops

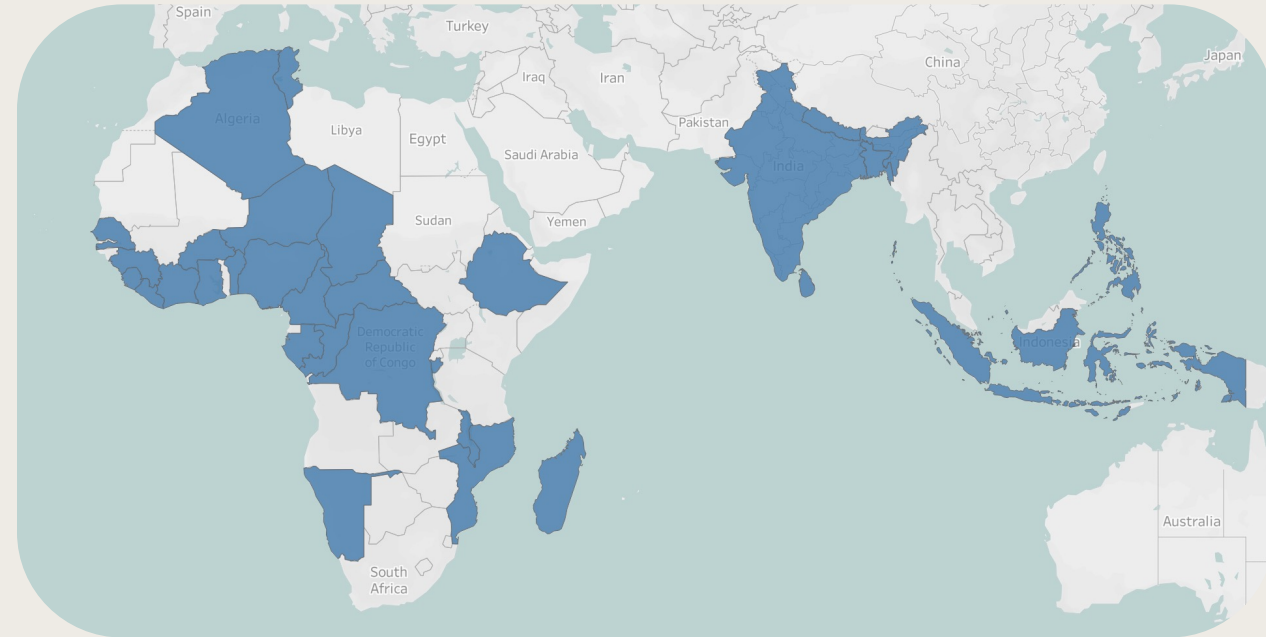

During an in-country workshop, the SARE tool is used as a practical planning, monitoring and evaluation tool to guide, develop and refine rabies elimination programs.

Assessing rabies elimination programs

Stepwise Approach towards Rabies Elimination workshops

During an in-country workshop, the SARE tool is used as a practical planning, monitoring and evaluation tool to guide, develop and refine rabies elimination programs.

Countries where GARC has facilitated in-country SARE workshops

The GARC Education Platform

The GARC Education Platform

provides access to:

- Series of **online certificate courses** at no cost to users.
- Standardized, quality knowledge and training.
- **Self-paced**, designed to support participants to succeed.

The GARC Education Platform

RABIES EDUCATOR CERTIFICATE

23,714
Graduates
since 2015

COMMUNITY COORDINATOR
FOR RABIES CERTIFICATE

3,940
Graduates
since 2016

ANIMAL HANDLING & VACCINATION
CERTIFICATE

5,180
Graduates
since 2015

DOG WELFARE CERTIFICATE

862
Graduates
since 2024

RABIES HEALTHCARE CERTIFICATE

1,570
Graduates
since 2019

More than **30 million** people have benefited from the life-saving information provided through the courses since 2015.
