& Game reserves 4a (part), 11 (part), 12
(part), 13 (part) & 17

JE

Interactions between DVS and DWNP

- Botswana is a member of OIE
- Notifies diseases as per the OIE code
- Both Wild life and Livestock diseases notifiable to the OIE are reported by the Director of Veterinary Services

Movement of Wild Animals within Botswana

- Movement of Wild animals between these Zones is allowed through a movement permit issued by the certified Veterinary officials
- Cloven hoofed animals are not allowed movement from FMD vaccination zones to the rest of other zones
- Other animals are allowed movement after inspection by the Veterinary officials

Import and Export

- Movement of wild animals to outside Botswana is allowed after a client has acquired a permission from the DWNP
- DVS does the test after the animals has being allowed permission by the DWNP to satisfy import conditions

Disease surveillance

- When doing disease surveillance, the Director of Veterinary services request a capture permit from the Director of DWNP
- The two Department releases officials for capture to take place e.g. EUS and FMD surveillance.

Game Ranching

- The two Department also liase with each other to allow farming of wildlife in Livestock areas
