

AT A GLANCE: PARTNERING AND INVESTING FOR A PPR-FREE WORLD

SUMMARY

The FAO-OIE partnership to remove the PPR threat posed to millions of livelihoods around the world is in full force. The solution is established, the technical know-how is ensured and priority areas have been set by the experts.

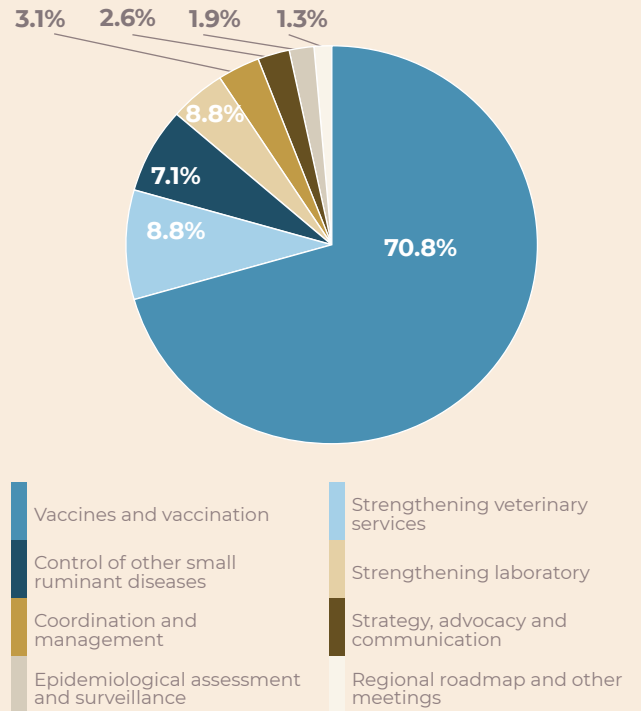

Of the approximately USD 1 billion needed for the Global Eradication Programme (GEP), we have secured and estimated USD 656 million through traditional donors and self-funded activities.

Our top donors so far are IFAD, European Union, World Bank, Japan, FAO (TCP), Sweden and the United States.

Currently, an estimated funding gap of USD 340 million still exists.

COMPOSITION PPR - GEP

PRIORITY AREAS

- Vaccination of additional 694 million sheep and goats
- Risk analysis and early warning activities
- Strategy, advocacy and communication materials production and distribution
- Capacity building of veterinary services and stakeholders
- Regional Roadmap meetings, stakeholder consultations and field monitoring
- Control of other small ruminant diseases
- Global and regional coordination
