OIE Objectives

ACTIVITIES OF VETERINARY SERVICES

- To provide expertise and encourage international solidarity in the control of animal diseases
- To improve the legal framework and resources of national Veterinary Services

PVS concept linked with these objectives

What is the OIE PVS ?

A tool to assess level of compliance of VNS with OIE international standards :

- to promulgate health standards for the safety of international **trade** in animals and animal products (within OIE WTO mandate) and for animal disease **surveillance**
- to contribute to **food safety** and food security
- to promote **animal welfare**, through a science-based approach

 Terrestrial Animal Health Code

The ideal chronology:

1. Initial PVS evaluation
2. PVS Gap Analysis
3. Investment programmes
4. PVS follow-up evaluations

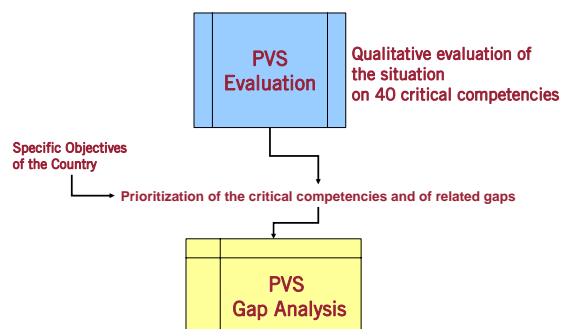

The ideal chronology:

- Initial country PVS Evaluations: *the diagnosis*
- PVS Gap Analysis: *the treatment proposed*
 - Support to identification of priority countries
 - Support to identification of priorities for the countries
- PVS follow-up Evaluations: *regular assessment of progress made after investments / legislative changes / reorganisation / strengthening of public-private partnerships, made in response to PVS evaluations and PVS Gap Analysis.*

Main Steps of PVS Gap Analysis

- PVS Reports available and official request from the OIE Delegate to the OIE (*prerequisites*)
- Proposal of dates and PVS Gap Analysis Team by the OIE (one team leader, one or two expert(s), and possibly one or two observer(s))
- Acceptance of proposals by the Country
- Mission completed
- Draft PVS Gap Analysis Documents
- Quality check
- Country agreement/comments on the draft report
- Finalisation of the document with country concerned
- Confidential status of the documents until the country agrees to its transmission to Donors and Partners

PVS Gap Analysis process

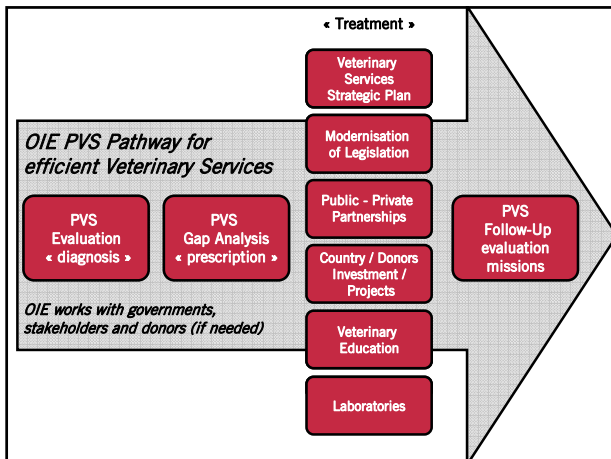

PVS Gap Analysis process

- A series of different national factors and conditions need to be taken into consideration when shifting from the qualitative evaluation (PVS report on levels) to a quantitative assessment of needs and priorities.
- Link between OIE-PVS Evaluations and Gap Analysis of PVS Outcomes: Evaluation of Needs and Priorities

PVS Gap Analysis process

- Donors' investment programmes
- This will be used by the countries, in collaboration with Partners and Donors, in the preparation of investment programmes, aimed at reaching the determined level of improvement and directly linked to the OIE international standards on quality of veterinary services.

PVS Gap Analysis – lessons learnt

- The best is the harmonization of recommendations, the easiest is the setting of priorities on investments
- The gradual progression in the PVS Gap Analysis process has to be reinforced with the proper path correlated with the country's priorities
- This exercise has highlighted the PVS' capacity building positive consequences
- It also should be used as a self-evaluation tool.
