

Global Alliance for Rabies Control (GARC) activities in Africa (PARACON)

ONLINE

9 -11 FEBRUARY 2021

Dr André COETZER

ORGANISATION MONDIALE DE LA SANTÉ ANIMALE
Protéger les animaux, préserver notre avenir

Introduction

- To achieve global dog-mediated rabies elimination we will have to rapidly progress beyond individual [pilot] projects
 - >200 countries suffer from rabies!
- Effective rabies elimination relies on a **global country-centric plan.**
- GARC supports the elimination of rabies by supporting governments towards achieving their own goals.
 - Utilize three GARC regional rabies networks.

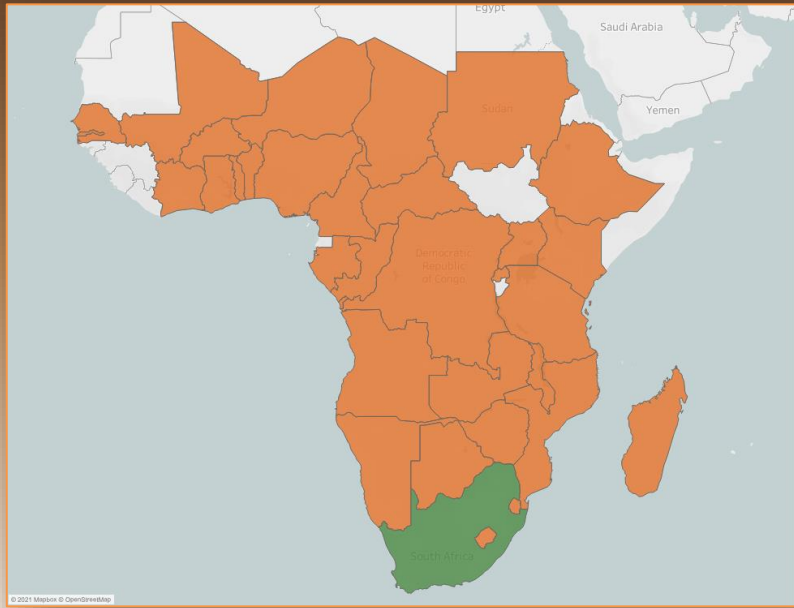

Pan-African Rabies Control Network (PARACON)

- The first of the GARC regional rabies control networks.
 - Pan-African rabies network for sub-Saharan Africa.
- The inaugural workshop was held in 2015
 - The objective to eliminate dog transmitted human rabies by 2030 was accepted at the inaugural workshop and was subsequently taken up globally.

PARACON workshops

2015

33 countries

Conference of the
**OIE Regional Commission
for Africa**

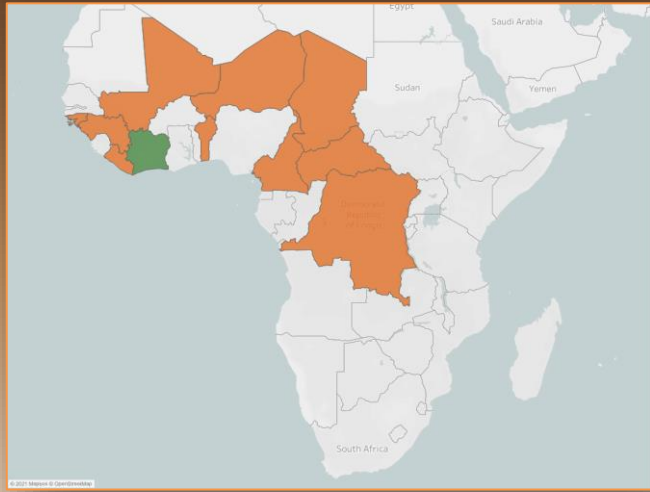

Stepwise Approach Towards Rabies Elimination (SARE)

ORGANISATION MONDIALE DE LA SANTÉ ANIMALE
Protéger les animaux, préserver notre avenir

PARACON workshops

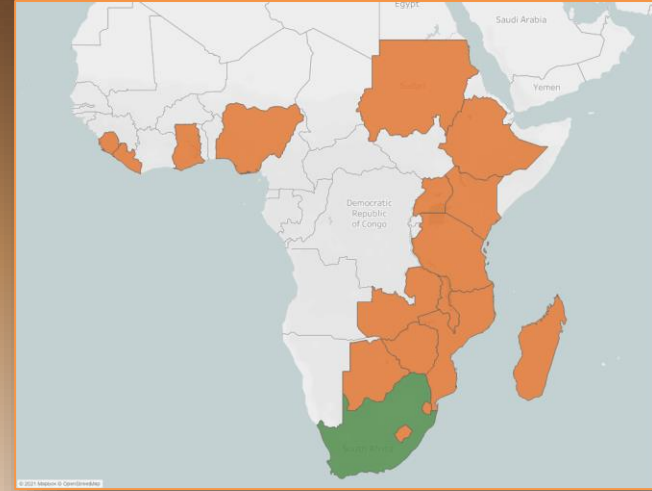

2016

11 countries

Rabies Epidemiological Bulletin

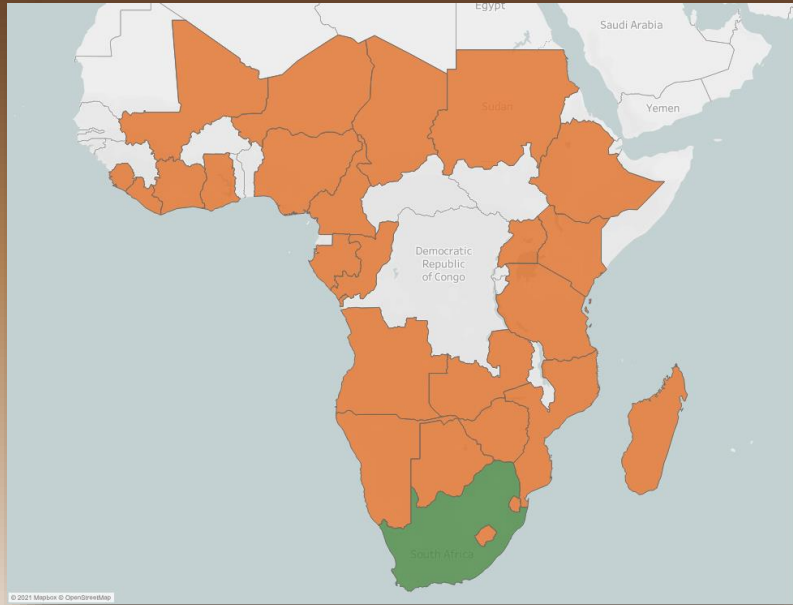

2017

18 countries

Conference of the
OIE Regional Commission
for Africa

PARACON workshops

2018

27 countries

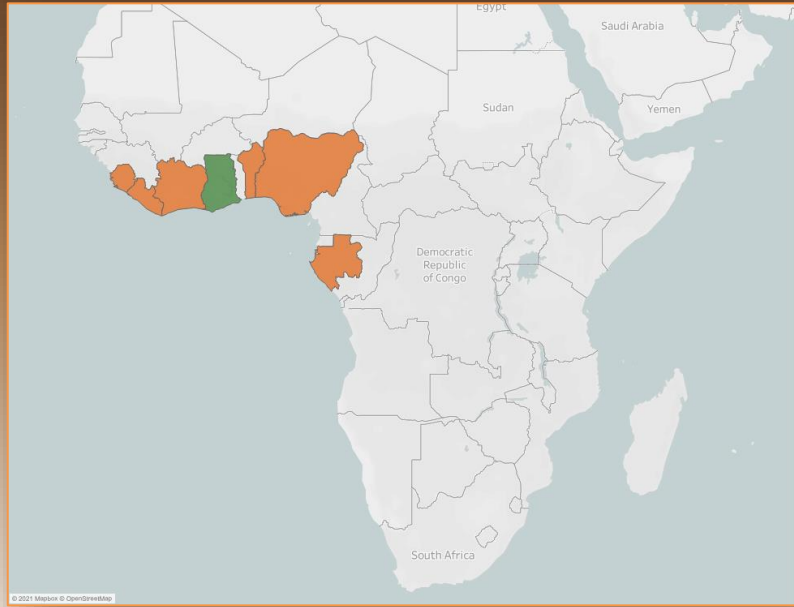

Conference of the
